

Brewing Excellence

Filterflow Automatic Water Boiler

1228

MODEL 1228

Manufactured to the highest standards, Bloomfield automatic water dispenser combines style, function, reliability and value for money with a pioneering new development in water boiler filtration. A water filter is essential, not only in hard water areas to reduce problematic scale build-up, but also to remove impurities that can leave an unpleasant taste. Until now, these filters have always been plumbed in as a separate unit. This is unattractive and adds cost. FilterFlow is ingeniously different. It revolutionizes water boiler design by incorporating the filter cartridge within the boiler casing.

FEATURES

- Electric automatic water dispenser
- Electronic control system
- Standby mode
- · LCD information panel
- Supplied with removable drop tray and water feed hose
- Built-in filtration cartridge
- Adjustable temperature (158°F 205°F)
- Advanced diagnostics
- Non-drip tap

ACCESSORIES

- · First filter cartridge
- Drip tray
- Water feed hose

OPTIONAL ACCESSORIES

- · Wall mounting kit
- Replacement filter cartridge

PRODUCT WARRANTY

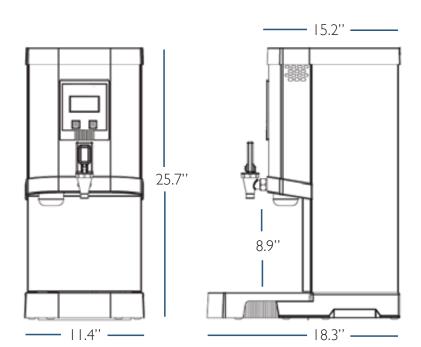

Limited one year parts & labor
