MetroMax iQ™ Storage System :-)

Interchangeability: MetroMax i™ and MetroMax Q, shelves, posts, and most accessories are uniquely interchangeable making the iQ system adaptable to your specific application.

Longer-Life Durability and Performance: Corrosion proof MetroMax i™ has an innovative polymer design and the performance of stainless steel at a fraction of the cost. MetroMax Q™ has an advanced polymer and epoxy coated steel design that offers superior performance versus wire shelving. All shelves can be cleaned in a fraction of the time of wire.

Designed with innovative polymers for longer-life product performance, easy-to-clean surfaces to promote a cleaner environment and higher level of safety, interchangeable components for maximum flexibility, interactive on-line tools...a truly unique way to improve operational efficiencies, productivity, and ultimately ROI.

Improved Cleanability: iQ System shelves have removable polymer mats that are easily cleaned in sinks, wash or dish machines. Cleaner shelves promote safe environments.

Storage Optimization: iQ System accessories contain, compartmentalize, and organize your stored contents to maximize every square inch of storage space. Smooth polymer components protect fragile packaged items.

Selecting system components for your

*"The choice was easy...
Our facility needed the most
cleanable, most durable,
and totally corrosion proof
system available, and
MetroMax i™ was all that
and cost efficient."*

*"We put extremely heavy loads
on our MetroMax i Top-Track
system, so we opted for the steel
posts for added rigidity."*

MetroMax Q™
Unique Value...

- Quick-to-adjust Shelves Provide Maximum Space Utilization
- Corrosion Resistant, 15 Year Warranty Against Corrosion
- Epoxy Coated Wire Shelf Frames and Posts
- Removable, Easily Cleanable Shelf Mats
- Open Grid Shelves

Interchangeable shelves, posts, and accessories provide increased storage efficiencies.

Microban®
antimicrobial product protection

All shelf mats, posts, and touch points have built in Microban® antimicrobial product protection.

application... it's a no brainer.

METRO®

"While outfitting a damp area with shelving, we were able to upgrade our system; all 4 posts are now polymer and the bottom shelf is a Heavy Duty polymer as well... the units fit perfectly into our budget and provides long-term value."

"We've typically purchased standard wire shelving, but these days value is a must. Upgrading to MetroMax Q is the perfect balance between price and value. it's easy to clean and resists rust and corrosion, for a longer shelf life."

antimicrobial product protection

MetroMax i™ Replacement Wedges
Bag of (4)
Cat. No. MX9985
List Price 9.00 each
MetroMax i™ Wedges are not compatible with original MetroMax shelves and posts.

Post Clamp
Adds stability by joining posts of two separate units together. With it, each unit is supported by four posts and buttressed by the adjacent unit.
Cat. No. 9994X
List Price 16.20 each

Foot Plate
Use to add stability to the shelving unit or to bolt units to the floor.
Cat. No. Zinc 9993Z
List Price 11.50 each

Cat. No. Stainless Steel 9993S
List Price 26.00 each

Note: MetroMax i™ shelves, posts, and wedges are not compatable with original MetroMax shelves and posts.

MetroMax Q™ Shelving 9.21

Bag of (4)
Cat. No. MQ9985
List Price 8.90 each
MetroMax Q™ Wedges are compatible with original MetroMax Q shelves and posts.

Microban®
antimicrobial product protection

Go mobile.

Add casters to any shelving unit to add versatility.

MetroMax iQ Stem Casters   9.25

For use with either MetroMax i polymer or MetroMax Q steel stem caster posts.

- Promotes easy cleaning. Casters allow shelving units to be moved easily for access to floors and walls.
- Efficient Transport: Create a cart to efficiently move supplies throughout a facility or campus.

5PCX

5PCBX

5MPX

Rigid stem casters are often ordered two per unit for improved tracking and handling. Rigid caster channels are provided with each two rigid stem casters at no charge.

Polymer Stem Casters   9.25

- Corrosion resistant performance: all-polymer horn, stainless steel axel and hardware, 5" (127mm) diameter polyurethane wheel, sleeve-style axle bearing, and an optional toe-operated brake mechanism.
- Models available with antimicrobial product protection built into the tread
- Load rating of 300 lbs. (135kg) and a temperature range from -20° to 120° F (-29° to 49° C) [continuous].
- Bumpers included

Wheel Tread	Type	Diameter (in.)	(mm)	Width (in.)	(mm)	Approx. Pkd. Wt. (lbs.)	(kg)	Cat. No.	List Price Each	Cat. No. Antimicrobial	List Price Each
Polyurethane	Swivel	5	127	$1^1/_4$	32	2	.9	**5PCX**	72.00	**5PCXM**	80.00

Push ahead.

Give yourself the versatility you need with Metro Utility Carts.

Utility Carts

- Can be used in a variety of unique transport applications.
- Durable materials, ergonomic handles, and premium casters promote long life and ease of use.
- Microban product protection built into the shelf mats, frames, and posts.
- Easier to clean with removable shelf mats.

MetroMax i™ Utility Carts

- Corrosion proof shelves, posts, and type 304 stainless steel handle.
- Corrosion resistant 5PCX casters with 5" (127mm) polyurethane wheels, polymer horns, and stainless steel axles.
- 39-1/4" (997mm) tall. Weight capacity of cart: 900 lb. (408kg) evenly distributed.

Helpful Hints

- Configure a cart to your exact needs using a combination of MetroMax i™ and Q™ shelves and posts.
- Consider MetroMax i solid shelves when spill containment is required or to protect supplies from dirt during transport.
- A typical utility cart will be configured using 27" (685mm) or 33" (875mm) stem caster posts with 5" casters.

Organize.

Organize supplies to improve operational efficiencies.

- Well-organized storage results in fewer expired supplies and less waste.
- Innovative shelf and accessory designs have smooth surfaces that protect vacuum sealed and other packaged items from damage.
- Flexible compartments help sort supplies for faster access and maximize the use of storage space.

A Dividers   **B** Ledges   **C** Enclosure Panels   **D** Metro Totes   **E** Metro Bins

Flexible Compartments

Dividers and Ledges can be used to create flexible compartments that most efficiently use available storage space. When combined with open grid shelves this minimizes dust accumulation.

Bins offer removable compartmentalized storage for easy access or as part of an exchange system.
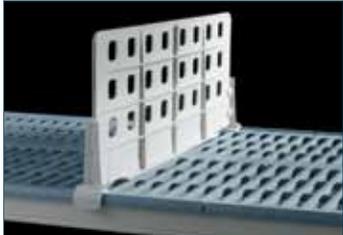

8" (203mm) Shelf Dividers – standard duty   9.25

- i and Q versions available
- Use to create organized compartments or to simply separate shelf contents.
- Easily repositioned on grid and solid shelves
- Corrosion proof

Nominal Length		Approx. Pkd. Wt.		i	Q	List Price Each

Contain it.

Efficiently enclose and contain with Enclosure Panels.

Enclosure Panels 9.25

- An efficient way of enclosing the sides and back of all shelves in a unit to contain stored contents.
- Slot opening: 3" W x 3-7/8" H
- Designed to work with MetroMax i™ and MetroMax Q shelves. Mounting clips included.

Use shelf to shelf dividers with enclosure panels to create full height compartments to organize bulky, hard-to-handle supplies.

74" (1880mm)	(2) MEP37E	(2) MEP57E	(2) MEP57E

Configuration Notes

1. Handles and enclosure panels can be used on the same end of the cart. Please note the following details: 21" (530mm) wide units: use the 12-3/8 (315mm) wide panel on the same end as the handle.

2. Top-Track: When using on the ends of a Top-Track mobile unit the enclosure panel must be mounted so that it does not interfere with the overhead tracks. Mobile posts on Top-Track are 74"(1880mm). The standard enclosure panel for 74"(1880mm) posts can be used but must be mounted in a lower position on the unit. As an alternative, the standard panels for a 63" (1600mm) post can be used.

Security.

MetroMax iQ™ Storage System

MetroMax Q Security Units 14.01

Protects valuable materials and sensitive items from loss or pilferage.

- Ready view of contents: Heavy gauge open wire construction keep contents visible at all times, making it easy to check inventory.
- Microban antimicrobial product protection is built into the enclosures, doors, handles, and shelves to keep the product "cleaner between cleanings."
- Optional intermediate shelves: MetroMax Q quick adjust shelves or corrosion proof MetroMax i.
- Double door with ergonomic ¼-turn handle: Each door opens 270 degrees and can be secured along the sides of the unit.
- Shipped knocked down to save on freight costs. Assembles in minutes.

MQSEC53VE with optional intermediate shelves

MetroMax iQ™ qwikTRAK   11.15

Maximizes Storage Capacity: qwikTRAK can increase the storage capacity of a given area by 30% to 40%. The system allows more storage units to fit in a defined space. A movable, open aisle allows full access to each entire shelving unit thus eliminating hard to reach or "dead" spaces.

Accessible and Ergonomic: The low profile and sloped sides of the guiding track, combined with the easy-to-move mobile units, provide safe and easy access to all stored products. Mobile units roll easily along the track, even when moving heavy loads.

Uniquely Interchangeable: Mix and match MetroMax i™ and Q shelves and posts based on the application. Corrosion proof MetroMax i™ offers solid shelf option and better chemical resistance. Corrosion resistant MetroMax Q steel posts can improve the overall rigidity of the qwikTRAK system in higher weight bearing applications.

Floor tracks compensate for rough or choppy floors and provide a smooth, level surface to guide the mobile units in a straight line. MetroMax i™ mobile units can hold up to 1,200 lbs. (544kg) per unit. MetroMax Q mobile units can hold up to 2,000 lbs. (544kg) per unit.

Stationary End Unit Kit – Order one per qwikTRAK system.

- Kit includes the hardware and components needed to connect track sets to two stationary end units. 74" (1880mm) posts included. Shelves are ordered separately.

Approx. Pkd. Wt. (lbs.)	(kg)	i End Unit Kit Cat. No.	List Price Each	Approx. Pkd. Wt. (lbs.)	(kg)	Q End Unit Kit Cat. No.	List Price Each
25.0	11.4	BTEX3	632.00	42.0	19.1	BTEQ3	516.00

Stationary Intermediate Unit Kit –
Required when the desired length of track exceeds 21' (6405mm).

- A stationary intermediate kit may be used at the discretion of the end user when track lengths are less than 21' (6405mm) to increase the overall rigidity of the system. Kit includes the hardware and components needed to connect track sets to one stationary intermediate unit. 74" (1880mm) posts included. Shelves are ordered separately.

Configuration Guidelines

1. All end, intermediate, and mobile units must be 18" (457mm) or wider.
2. qwikTRAK is available with 74" posts (1880mm) as standard. Requests for TALLER posts must be reviewed by Metro Engineering. For applications requiring posts SHORTER than 74" (1880mm), contact your Metro representative.
3. Under normal conditions, aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).
4. A stationary intermediate unit is required when the track length exceeds 21 feet (6405mm). A stationary intermediate unit may be used at the discretion of the user when the track lengths are less than 21 ft. (6405mm).
5. It is recommended that the tracks are installed a minimum of 1-3/4" (45mm) from the wall.
6. Actual width of a qwikTRAK system is the Nominal Shelf length + 3-1/2" (89mm).
7. Actual height of a mobile qwikTRAK unit is: Nominal post height + 4.5" (115mm)
8. Actual length of a qwikTRAK system is: Nominal track length + the nominal width of each end unit + 3" (76mm).
9. Weight capacities for standard qwikTRAK: MetroMax Q systems are designed to hold up to 2,000 lbs. (907kg) per shelving unit. MetroMax i™ stationary units can hold up to 2,000 lbs. (907kg); MetroMax i mobile units can hold up to 1,200 lbs. (544kg) per unit.

E = Active Aisle

Configuration Guidelines

1. All end, intermediate, and mobile units must be 18" (457mm) or wider.

2. Each stationary end and intermediate unit must have a minimum of four shelves.

3. Double Deep qwikTRAK is available with 74" posts (1880mm) as standard. Requests for TALLER posts must be reviewed by Metro Engineering. For applications requiring posts SHORTER than 74" (1880mm), contact your Metro representative.

4. Under normal conditions, aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).

5. Two stationary intermediate units connected end to end are required when the track length exceeds 21 feet (6405mm). Stationary intermediate units may be used at the discretion of the user when the track lengths are less than 21 ft. (6405mm).

6. It is recommended that the tracks are installed a minimum of 1-3/4" (45mm) from the wall.

7. Maximum allowable shelf length for use with a double deep system is 60" (1524mm).

8. The maximum width of a double deep configuration is 10'6" (3200mm). (i.e., two systems, each having 60" (1524mm) long shelves, plus 6" (150mm) for qwikTRAK components.

9. Actual width of a double deep configuration is the Nominal Shelf Length + 3-1/2" (89mm).

10. Weight capacities: Double Deep Mobile Units — MetroMax Q: 3,000 lbs. (1364kg) evenly distributed. MetroMax: 1,800 lbs. (818kg) evenly distributed.

11. Stationary End and Intermediate Units — Each end and intermediate double deep unit consists of two independent stationary shelving units positioned side by side. Each shelving unit has a maximum weight capacity of 2000 lbs. (904kg) evenly distributed.

23

MetroMax iQ™ Top-Track   9.29

The system compensates for uneven floor surfaces. Floor should be smooth and free from large cracks or raised obstacles. Maximum load capacity for mobile units is 900 lbs. (410kg).

Maximizes Storage Capacity: Top-Track can increase the storage capacity of a given area by 30% to 40%. Put more storage units into a defined space. A movable, open aisle allows full access to each entire shelving unit–eliminating hard to reach or "dead" spaces.

Easy Access: The overhead track system guides the mobile units and opens an access aisle between any two units. The track is above the storage units enabling easy access.

Clean Design: Guide tracks are installed overhead enabling easy cleaning of floors. MetroMax i™ and MetroMax Q shelves feature removable polymer shelf mats and built-in Microban antimicrobial product protection to promote easier routine cleaning.

Uniquely Interchangeable: Mix and match MetroMax i™ and Q shelves and posts based on the application. Corrosion proof MetroMax i™ offers solid shelf option and better chemical resistance. Corrosion resistant MetroMax Q steel posts can improve the overall rigidity of the Top-Track system in higher weight bearing applications.

Stationary End Unit Kit – Order one per Top-Track system.

• Includes hardware and components to connect track sets to two stationary end units. 86" (2185mm) posts included. Shelves are ordered separately.

13	3962	92	41.4	TTS13NA	961.00						

Note: TTS2.5NA includes a joining kit to connect the tracks to longer track sections.

Configuration Guidelines

1. Standard Top-Track models include 86" (2185mm) stationary posts and 74" (1880mm) stem caster mobile posts. If a taller system is required, consult Metro Engineering.
2. Mobile, stationary end, and intermediate units must have a minimum of 4 shelves.
3. Stationary Intermediate Unit is required when the track length exceeds 21' (6405mm). Intermediate kits include special support rails that attach to the overhead tracks on both sides of the intermediate unit. A stationary intermediate unit may be used at the discretion of the user when track lengths are less than 21' (6405mm) for the purpose of adding greater stability to the overall system.
4. Mobile Units: If 18" (457mm) wide mobile units are planned, the maximum allowable size shelf is 60" (1524mm) long. If 18" (457mm) wide by 60" (1524mm) long mobile units are planned, a maximum of five 18" (457mm) mobile units are allowable between two stationary units. 18" (457mm), 21" (530mm) and 24" (610mm) wide mobile units can be intermixed in a given system. The standard system requires 74" (1880mm) posts on the mobile units. Recommended maximum load rating for a mobile unit is 900 lbs. (410kg).
5. Under normal conditions, an aisle of 30" to 36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).
6. To accommodate bumpers, the actual size of a mobile unit is 2.5" (63.5mm) wider than the shelf width shown. For example, an 18"(457mm) wide unit is actually 20.5" (521mm).
7. To calculate the overall length of a MetroMax or MetroMax Q Top-Track System, add the following: Nominal track length + Nominal widths of each end unit + 2" (51mm).
