Food Safety

Keeping your operation safe is mandated, but it doesn't have to be difficult. At Cambro, we design all of our products with food safety in mind. They must pass our own critical StoreSafe® requirements which support HACCP guidelines for food safety before they can be introduced to the marketplace. Key factors that our products must be able to help foodservice operators are:

- Time and temperature abuse
- Reducing potential cross-contamination
- Ease of cleaning

Cam GoBoxes will ensure that food stays at safe temperatures below 39.2°F or above 149°F for many hours during holding and transport. Use them with our Camchillers® and Camwarmers® to extend cold and hot holding time even further. Also, Cam GoBoxes, when used together with our GN pans and covers, provide the best solution to keep both food protected and your transporter clean and free of any potential cross-contamination.
