

Kegeator

FEATURES:

- Fan assisted cooling
- Automatic defrost
- Single stainless steel tube beer dispenser to ensure bacterial resistance with two faucets
- Fan assisted condenser
- Digital controller and temperature display
- Magnetic door gasket(s) for positive door seal
- Side mounted compressor
- 2 year parts & labour warranty
- 5 year compressor warranty

Kegeerator

Model: GDD-49 / GDD-61 / GDD-73

Description

The Glacier draft beer system has ample space to hold different kegs of beer. Beer dispenses through a single tube with one handle to ensure bacterial resistance. If any product spills while dispensing, a drip tray catches it to keep the countertop surface clean.

To further retain chill, the doors are sealed tight with magnetic gaskets. Equipped with electronic controls, users can adjust the temperature of the draft beer cooler from 33 to 38 degrees Fahrenheit. It cools with R290 hydrocarbon refrigerant for environmental purposes, and the refrigeration system is self-contained to streamline installation. The unit defrosts automatically to reduce ice buildup, and the evaporator coil is epoxy coated so it won't corrode. Designed with stainless steel construction, the top can be used as a durable workstation that is convenient to wipe clean.
