PASTA COOKERS

PERFECT PASTA

EVERY SINGLE TIME

Italiana FoodTech has the largest selection of pasta cookers in North America. Made from high quality stainless steel and designed specifically to stand up to the rigours of boiling salt water. These pasta cookers are well suited for cooking fresh, dry or frozen pasta, and also work flawlessly with Asian noodles, eggs, vegetables and rice.

The large selection of pasta cooker sizes, basket sizes and the choice of either gas or electric heating, there is a pasta cooker for every need and space. Italiana FoodTech pasta cookers will exceed your expectations and the demands of your restaurant.

FEATURES

Durability

- Body constructed from AISI 304 stainless steel
- Seamless welded tanks prevent water penetration/ leakage
- Marine grade double pressed stainless steel, made to withstand the long term corrosive effects of salt water
- Covered and protected water tap to prevent accidental damage while inserting and extracting baskets
- Baskets made from high quality stainless steel, for long lasting performance
- All models are ETL listed for the USA and Canada

Versatility

- Adjustable feet for leveling
- Many models and sizes available for a perfect fit
- Baskets available in multiple sizes to allow for simultaneous cooking of different foods
- Available counter top models, perfect for gluten free use, or for small restaurants
- Cook anything that could be boiled in a pot
- Natural gas, propane and Electric models available
- Caster wheels available
- Custom colours available

Performance

- Strategically positioned water drain allows water flow to self clean any excess starch from the tank
- Powerful heating system brings water to a boil in as little as 20 min
- Automatic water filling available on select models

Colours

- All models are available in black, white, red, green, grey and unpainted (stainless steel)

GAS+ PASTA COOKERS

The **Gas+ Pasta Cooker** uses a two powerful burners to bring water to a boil in half the time. This makes it a great option for boiling products from frozen, when time is limited or in fast paced restaurants. Additionally, the steam setting can be used for cooking foods like vegetables. The optional automatic water refilling feature on the Gas+ pasta cooker will maintain a consistent water level during continuous use.

GAS PASTA COOKERS

Italiana FoodTech **Gas Pasta Cookers** are available in both single and double tank versions, as with automatic water skimming and two tank sizes. They can be configured for use with either natural gas or propane depending on the needs of your location.

AUTOMATIC BASKET LIFTERS

An **Automatic Basket Lifter** lowers and raises baskets from the water on a set timer. No monitoring or staff is required to prevent over cooking. Each lifter works separately with independent timers ensuring consistent products.

PASTA COOKER BASKETS

Italiana Foodtech offers six different **Pasta Cooker Basket** sizes for use in both counter-top and floor standing pasta cooker models. These baskets can be mixed and matched as needed to cook anywhere from two to twenty portions. Made from corrosion resistant stainless steel these baskets are designed to endure every day use. They can be attached to a pasta lifter to automatically lift out of the boiling water and the end of the time for the ultimate convenience and efficiency.

AUTOMATIC BASKET LIFTERS

How to use the lifter

1. Set each lifter's timer with the desired cooking time
2. Place pasta, vegetables, rice, etc in the basket
3. Press the lowering switch
4. The lifter will beep to notify you that the pasta has been lifted out of the water
5. Remove the basket for the lifter and serve
6. The result: perfectly cooked pasta every time!
