Stagionello®

Fumotic® **ClimaTouch®**

Produce salami on an average of only 20 days!

Stagionello® is the original and the first unit to create a series of microclimates ideal for traditional salami processing. On an average of only 20 days, Stagionello® can help you produce genuine meats without the need for chemical additives, such as colorants. The commercial grade system (non monoblock) allows for the optimal temperature in a short period time. Temperature is then maintained thanks to the unified structure of high-density, high compression, non-toxic polyurethane foam thermal insulation. Stagionello®, combined with Fumotic®, is able to produce and manage humidity, cold smoke and or flavor the product inside the chamber. Like the Stagionello®Evo, the control system automatically manages the temperature, humidity and air speed for the duration of the programmed phases: salting, stewing, smoking / aromatization, drying and seasoning. Stagionello® is made of stainless steel aisi 304 with a scotch-brite finish, both internally and externally where in contact with food. The stainless steel door (not aluminum) has a large glass panel with the key/lock system, so as to allow the use both in the kitchen/laboratory or in a retail area. In the laboratory, the large glass panel allows you to monitor the transformation process, in a retail area it can be used as a showcase to cure and display simultaneously. The four adjustable stainless steel legs allow for perfect stability. Optionally, the exterior can also be customized by choosing from a wide range of colors. These are just some of the features that gave our technology worldwide status, making us the most copied food transformation technology in recent history.

Stagionello®Evo

Fumotic® **ClimaTouch®**

Produce salami on an average of only 20 days!

Stagionello®Evo, is the only curing cabinet guaranteed 100% made in Italy, patented with a rated load capacity of 150 kilograms. Our technologically advanced system is equipped with yet another patent, Fumotic®, this allows our unit to not only manage cooling, heating, air velocity, but also to produce and maintain the desired amount of humidity in a short period of time. The new control system used by Stagionello®Evo (Climatouch®) contains 30 classic Italian recipes preset into its memory, which can be modified by the user. To create your own product (eg salami milano) just scroll through the list and select the recipe name, Stagionello®Evo via the controller will automatically handle all production stages of that recipe. In the case of slow fermentation products (eg capicollo), even the delicate salting phase is automatically managed. Climatouch® allows you to create and save custom recipes, it could be an old family recipe, or create salami types from other countries as well. Stagionello®Evo comes standard with an evolved system of HACCP that meets all international standards.

150kg Capacity
Model STAGIONELLO 150

**ONLY MODEL
OF ITS KIND**

Special features:

- Equipped with dual internal fans
- Air exchange kit included

FOOD EQUIPMENT

Stagionello® & StagionelloEvo® CURING CABINET

NELLA

Made in Stainless Steel AISI 304

The most important advantage of using stainless steel AISI 304 is the fact that it is non-porous and easier to clean

Energy Efficient

The AISI 304 Stainless Steel body and doors are fully injected with CFC free polyurethane foam creating a unibody frame and higher R-value

Professional grade Non Monoblock system

Our non monoblock system is comprised of various components specially designed with the capability to be used for seasoning and dry aging, and can function in an ambient temperature range for up to +32°C (89.6°F)

Alarms

There are a number of alarms built into the system to protect the Stagionello®

Lock and Key

Equipped with a lock and key system for additional safety

Probes

There are 4 standard probes included in all Stagionello® units

- Humidity probe which monitors the ambient humidity inside the entire chamber
- Ambient probe to monitor the temperature inside the entire chamber
- Evaporator/defrost probe to visualize the temperature of evaporation and controls the temperature of defrosting in order to conserve energy
- Condenser probe to visualize the temperature of the condenser

Tank

The tank system is designed to work with the Fumotic® to provide humidity when needed and aroma flavor as desired by the user.

Doors

The doors are designed and built in AISI 304 stainless steel, dual insulated glass panels with UV protection of 59%, pressure valve for high altitudes, resistance lines to minimize condensation and soften door seals at lower temperatures.

Climatouch®

A revolutionary automatic control system with a 6-inch touch screen display that automatically manages all sequential processing stages, calculating pH levels during the fermentation process guaranteeing a quality product. It includes preset recipes and allows the user to have access to the system which controls the functionality of the unit.

Pre-Calibrated pH Probe (Optional Item 41263)

Our pH probe is designed to connect to a PLC and communicate data from the product to the Display, record and store it for later use.

Fumotic®

This is a dual purpose system for regulating humidity and flavoring

Guide Sets, Hanging Rods, Grills/Racks

(Only apply to STGPNTF60, STG100TF0 & STGTWTF0)

Standard guide sets and rods are made from AISI 304 and are suited to distribute the weight of the maximum amount of product designed for that unit.

Adjustable Legs

All units are equipped with AISI 304 stainless steel adjustable legs for uneven floors. There is an optional 13cm (5.2") wheel kit available for those who need increased mobility.
