

# LAPCO FR™

## *Storage, Shelf-life and Disposal*

### STORAGE

LAPCO products can be stored in standard warehousing facilities. In general, store in a cool and dry place and avoid direct sunlight or other strong light for extended periods.

### SHELF LIFE

When properly stored in cool, dry conditions and away from sunlight or strong light, garments should achieve a shelf life of ten years or more. Garment discoloration may occur over time, but this will not affect the performance of the apparel.

Before each use, visually inspect all garments regardless of age for any damages or tears and to ensure all components function properly. Any apparel that is damaged in any way should not be used in any environment where the wearer may be exposed to flame hazards.

### DISPOSAL

**Uncontaminated Garments** can be disposed of using any standard method that conforms to local regulations.

**Contaminated Garments** - garments contaminated with any chemicals must be disposed of properly according to the disposal requirements of the chemical. It is the users' responsibility to ensure contaminated garments are disposed of appropriately in agreement with local regulations.
