

## POWER FAILURE NIGHTLIGHT WALLPLATE

The LumiCover Power Failure Nightlight Wallplate integrates the multiple benefits of a wallplate, nightlight and power failure light into one unit.

### LOW-PROFILE DESIGN

A nightlight wallplate design that allows access to both outlets

### EMERGENCY LIGHT

Front panel turns on when the power goes out

### SOFT LIGHTING

Dusk-to-dawn nightlight on bottom

## FEATURES

- ▶ Front panel remains powered by a rechargeable battery when the electricity goes out
- ▶ Stays on for hours without power
- ▶ LED diffused nightlight strip on bottom for a clearly illuminated pathway
- ▶ Perfect for hallways, stairways and entryways
- ▶ Integrated, low profile design allows access to both of your outlets, and eliminates the hassle of plug-in nightlights
- ▶ Midsized at 3 1/8" x 5 3/4", wallplate hides minor drywall imperfections
- ▶ Designed for operation with both ground up and ground down mounted outlets

## EASY TO INSTALL

- 1 Turn-off breaker power to the outlet and remove the existing wallplate.
- 2 Slide switch down on the lower backside to engage the battery. This will light the front panel until you complete install. Press the LumiCover into place. Copper fins will slide around each other side on the outlet to make its power connection. The front panel will turn off when power is restored in step 3 below.
- 3 Press the LumiCover into place and tighten the screws (included) to secure the LumiCover and turn the breaker power back on.
- 4 The outlet is ready to use!

## POWER FAILURE NIGHTLIGHTS
