

Rad Pad & Rad Pad Caddy

RAD PAD

We set out to develop a floor and seat pad that could be used indoors and outdoors while being easy to wash and disinfect. We utilized the waterproof, weatherproof, lightweight, chemical resistant, and high quality cushioning material that is used to make the cushioned soles of athletic shoes. This is the same material we've been using for the top cushions on our very popular Twisted Hex stools. We cast this material into the Rad Pad form.
