>breathe safe air

Zherorisk[®] is a research initiative by Litokol's R&D division with the participation of the University of Modena and Reggio Emilia, the DICAM (Department of Civil, Chemical, Environmental, and Materials Engineering) of Bologna and external research institutes. on raw materials and ways of combining them, aimed at developing an innovative generation of environmentally-friendly building products with "zero risks".

Zero risk for the user

✓ Given that most VOC emission occurs during application, the use of products with ultra-low VOC emission increases the safety of professional users; the lack of pungent and unpleasant odours makes the workplace much more comfortable.

✓ Non corrosive

- Non toxic
- Non-hazardous to the environment

C02

Zero risk for the environment

- Renewable primary materials
- Recycled materials
- ✓ Lower energy consumption
- ✓ Lower CO₂ emissions
- Reduced consumption of basic materials

Zero risk for homes

✓ Very low VOC emissions: A+

safeguarding the quality of air in homes and the health of those who live there.

Zero risk in transportation

 Product not subject to restrictions for road, sea, air and rail transport

✓ No ADR restrictions for road transport

✓ No IMO containers for transport by sea

Certifications

EC1 PLUS

Litokol products with Zherorisk® technology come with EMICODE EC1 PLUS certification and labelling, for "products with a very low volatile organic compound emission rate" in compliance with the guidelines issued by GEV (association for the control of building material emissions), with much lower values than the limit values.

Émission dans l'air intérieur

"Émission dans l'air intérieur" is the mandatory labelling of building products or wall and floor covering products used in buildings, in accordance with the French regulation on the characteristics of volatile pollution emissions (VOC) for the product. The product emission level is indicated by a class ranging from A+ (very low emissions) to C (high emissions), according to the same principle used for electrical appliances.

The Starlike[®] EVO collections are completed by a special range of colours, materials and effects which can also be combined with ceramic tiles or ultra-sophisticated mosaics, both in terms of aesthetic appeal and the type of material used.

Starlike[®] EVO Metallic Collection

With the Platinum, Shining Gold, Bronze, Copper and Rusty additives mixed in as the third component to Starlike[®] EVO Neutro 113, top-quality joints are obtained to match ceramic tiles or mosaics with metallic effects and colours.

Copper

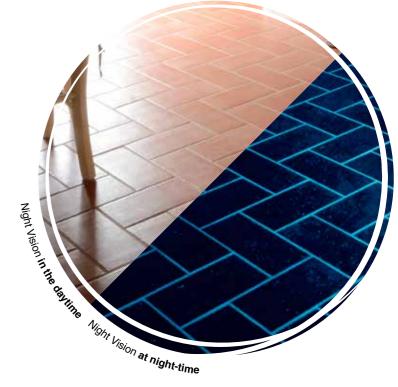

Starlike[®] EVO Night Vision

The Night Vision additive mixed in as the third component to Starlike[®] EVO allows you to obtain grouting which, after being exposed to sunlight or artificial light, emanates an amazing fluorescent colour for several hours after dark. The Night Vision additive, for indoor-use only, illuminates the joints with its spectacular and eye-catching effect.

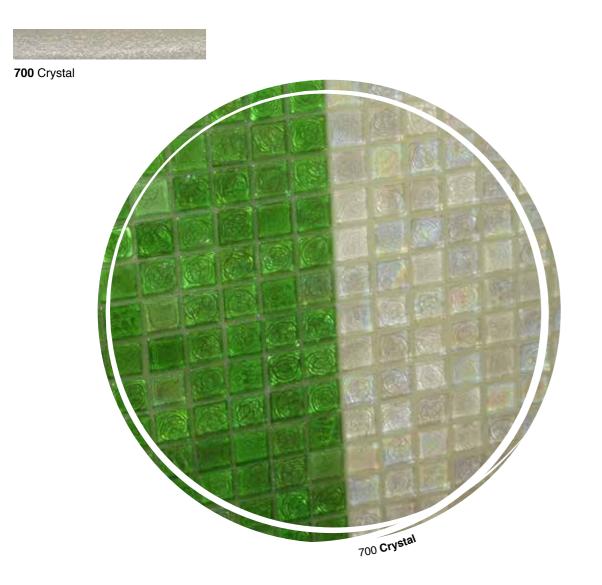

Night Vision

Starlike[®] Crystal EVO

Based on aggregate made from glass beads, Starlike[®] Crystal EVO is the perfect solution for grouting transparent and artistic glass mosaics. The translucent joint absorbs the colour of the transparent glass mosaics and takes on the same colour. This property makes Starlike[®] Crystal EVO the ideal grout for transparent glass mosaics with joints up to 3 mm in width. Thanks to its neutral colour and semi-transparent appearance, Starlike® Crystal EVO is also the recommended solution for artistic mosaics because it does not change the colours of the composition or interfere with the image.

Starlike[®] ColorCrystal EVO

While Starlike[®] Crystal EVO is used exclusively for grouting transparent or artistic glass mosaics, with Starlike[®] ColorCrystal EVO it is possible to achieve tone-on-tone grouting for mosaics that are not completely transparent or consist of both transparent and opaque tiles, which are difficult to harmonise with traditional grout. The Starlike® ColorCrystal EVO colours have been designed to adapt to decorative situations featuring a combination of different materials.

Starlike[®] EVO is the only product in the world that can be used in 3 different ways:

1 - epoxy filler for joints;

2 - class R2T adhesive

(improved reactive adhesive with no vertical slip);

3 - decorative **finish** for walls (with Decor additive).

Starlike[®] EVO is a two-component, acid-resistant epoxy grout for laying and grouting ceramic tiles and mosaics with joints between 1 and 15 mm in width. It is extremely easy to apply and clean and is ideal for direct contact with foodstuffs.

As an adhesive, it is particularly recommended in the case of installation of thin mosaic. As a smoother, it creates unique decorative solutions, smoothing the walls with the same colour as the grouting.

Identification data

Component A: thick coloured paste Appearance Component B: thick liquid

Classification according to EN 13888: RG - reactive grout sealant Classification according to EN 12004: R2T - high-performance reactive adhesive and no vertical slip Customs code: 35069190 Storage:

24 months in original packaging in a dry place.

Application data

Time before grouting floor application: • with normal-setting adhesive: 24 hours • with fast-setting adhesive: 4 hours • with mortar: 7-10 days Wall application • with normal-setting adhesive: 24 hours • with fast-setting adhesive: 4 hours • with mortar: 2-3 days Mixing ratios: Component A: 93.7 parts by weight Component B: 6.3 parts by weight The two components are pre-measured in their respective packaging Mix consistency: Thixotropic paste Specific gravity of mix 1.55 ka/l Mixture life: About 1 hour at $T = +23^{\circ}C$ Application temperatures allowed: From +10°C to +30°C **Recommended application temperature:** From +18°C to +23°C Set to light foot traffic: 24 hours at T = $+23^{\circ}$ C Ready for use: 5 days at $T = +23^{\circ}C$ Made In Italy

RG EN 13888 **NZI** EN 12004 PATENTED

Performance

Initial shear adhesion strength (EN 12003): ≥ 2 N/mm² Shear adhesion strength after water immersion (EN 12003): $\geq 2 \text{ N/mm}^2$ Shear adhesion strength after thermal shock (EN 12003): ≥ 2 N/mm² **Open time (EN 1346):** \geq 0.5 N/mm² after 20 minutes Determination of slip (EN 1308): ≤ 0.5 mm Resistance to abrasion (EN 12808-2): ≤ 250 mm³ Flexural tensile strength after 28 days at standard conditions (EN 12808-3): ≥ 30 N/mm² Compressive strength after 28 days at standard conditions (EN 12808-3): ≥ 45 N/mm² Shrinkage (EN 12808-4): ≤ 1.5 mm Water absorption after 4 hours (EN 12808-5): ≤ 0.1 g Working temperature: From - 20°C to +100°C

(EC1^p)

BEAUTY AND STRENGTH IN ALL RESIDENTIAL SETTINGS

GROUTING THAT IS RESISTANT TO THE MOST EXTREME INDUSTRIAL APPLICATIONS

WATERPROOF JOINT: STAIN AND DIRT PROOF

GROUTING IN DIRECT CONTRACT WITH CHEMICAL OR AGGRESSIVE SUBSTANCES

EASY-TO-CLEAN EVEN FOR APPLICATIONS ON VERY **ROUGH R12 TILES**

RESISTANT TO UV RAYS

Joint width: From 1 to 15 mm

FOR PUBLIC AND COMMERCIAL FLOORS WITH **HEAVY FOOTFALL**

EASY-TO-CLEAN JOINTS THAT DO NOT ABSORB LIQUIDS AND STAINS

IDEAL FOR CONTACT WITH FOODSTUFFS

Starlike[®] EVO Finishes

Application phases:

Empty the entire contents of the catalyst (B) onto the paste (A).

Special finishes: pour the additive onto the paste and mix slowly.

Mix using an electric drill fitted with a mixing paddle. Scrape the sides of the bucket to eliminate all parts of non-catalysed product.

The joints must be dry. Apply the paste in the joints using a green rubber float (art. 946GR), with diagonal movements in the direction of the joints. Remove the excess product.

The grout must be cleaned while the product is still wet. Sprinkle clean water. Clean initially using a moistened white felt pad (art. 109/GBNC) making circular movements. Ensure no water enters the joints.

Clean a second time with a sweepex sponge (art. 128G0001).

Any stains of the transparent product can be removed after 24 hours or, in any case, after the joint has hardened. Use Litonet EVO (floors) and Litonet Gel EVO (walls). Spread Litonet EVO or Litonet Gel EVO with the white felt pad.

Leave on for 15-30 minutes. Rub the surface with the white felt pad.

Rinse with clean water. Dry immediately with a clean cloth and do not wait for the rinse water to evaporate.
