

FIBERLITE ADVANTAGES

SOLID FIBERGLASS RIBS

Provides maximum strength to endure the harshest conditions. Our patented design, produced by Shakespeare Inc., features the only solid ribs in the industry. Fiberlite umbrellas' ribs and hardware are constructed of all stainless steel, nylon and fiberglass, meaning no rotting, rusting or distorting.

UNMATCHED FLEXIBILITY

Our patented solid .302 and .500 fiberglass rib lines allow our umbrellas to bend to the extreme limits without breaking or cracking. This flexibility allows our Fiberlite umbrellas to absorb high winds and abuse, or many other extreme situations.

CREATIVE CAPABILITIES

Customize our umbrella to fit your needs. Because we are made in the USA, we can easily change our design and patterns as needed, even adding silk screen logos or custom heat transfer graphics.
