COLD BREWER
FOR TEA AND COFFEE

Coffee Gator

Coffee Gator Cold Brewer

For cold brew tea and coffee

Squeeze every ounce of potential out of coffee and loose-leaf tea. Say hello to a naturally sweeter, healthier, brew.

For a full batch:

- 1 Remove lid and fill the central filter with:
6 scoops/75g/2.6oz of medium ground coffee
or 1-2 scoops/15-25g/0.5-0.9oz of loose leaf tea
- 2 Add 1.1l/37floz of cold water and replace the lid
- 3 Chill in the fridge (the brewer, not you). Allow 12-24 hours for coffee and 8-12 hours for tea (brew longer for stronger)
- 4 Once brewed, serve with or without removing the filter. If you want to add milk, lemon, sugar, etc, now's your chance

Cleaning

Holding the filter by the plastic frame, gently twist to remove from lid, then unscrew the filter cap. Rinse whole unit with warm water before it dries. If you need to, use a sponge on the filter: brushes could damage it.

Wash thoroughly before first use

- △ Glass: handle with care
- △ Keep out of reach of children, pets and clumsy people
- △ Do not use if glass is chipped or damaged: it could break without warning
- △ Handle the filter carefully (think of it as a delicate flower)
- △ Not recommended for dishwasher use
- △ When you're feeling gloomy, imagine an elephant making your bed
