

Scientific innovation inspired by nature is key to the Alphascience philosophy. The most powerful antioxidant molecules are very fragile and it is a real challenge to stabilize them as in their natural environment.

Since 2016, we have succeeded in reconstituting these natural reactions in each of our treatments thanks to an exclusive concentrate of technology and innovation.

Alphascience's dedication to the development of advanced professional skincare technologies has brought us a solid reputation with the medical community around the world.

ALPHASCIENCE
INNOVATIVE • SKIN • SCIENCE

"Nature is fundamental to each of our skin needs. To master all the virtues it has to offer us, I have observed it with passion for 35 years to replicate in cosmetics this natural synthesis ecosystem called Alphascience" Dr. Alfred Marchal

Dr. Alfred Marchal, Organic Chemistry PhD

Internationally recognized expert in the field of antioxidants and aesthetic medicine, with an academic experience of 35 years in R&D. He is the author of numerous scientific papers and patents on Vitamin C stabilization and Vitamin K1-oxide. He is a regular keynote speaker at medical congresses.

In 2016, he co-founded ALPHASCIENCE. He started working as Head of Research, in fundamental research, imagining the anti-aging treatments of the future and creating innovative exclusive solutions to fight skin aging: he managed to stabilize for the first time Tannic acid and L-Glutamine. He created a unique 3rd Generation Vitamin C complex, proven to be stable on the long term, under heat conditions and in the skin.

Dr. Marchal's infallible recipe for pushing the limits of innovation: observation of nature, knowledge of chemical molecules and their interactions, the scientific analysis of potential associations between elements, possible side effects and the way the active ingredient interacts with the skin structure. All of these, combined with a touch of genius.

A pioneer in the search for cutting-edge antioxidant complexes, Dr. Alfred Marchal is developing innovative products for ALPHASCIENCE, loved by doctors all around the world.

ALPHASCIENCE

INNOVATIVE • SKIN • SCIENCE

French Aesthetic Solutions

HIGHLY EFFICIENT SOLUTIONS

Alphascience has developed a daily routine for all skin types to support the skin's own ecosystem for health with ingredients of natural origin

PREVENT

Protect your skin from free radicals and maintain its vitality

ALPHA BRIGHT Serum

TANNIC [CF] Serum

PHYTIC [TC] Serum

ALPHA BRIGHT Serum Ampoules

MOISTURIZE

Revitalize the skin's ecosystem to fight against the effects of photoaging

SURFACE [CR]

ULTRA DEEP

EYE MATRIX

HA BOOSTER Serum

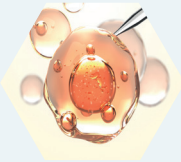

ULTRA FIRM

POST PROCEDURE

Reinforce and sublimates the effects of a cosmetic procedure

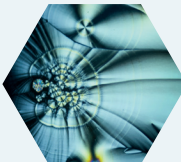

REGEN [HX]

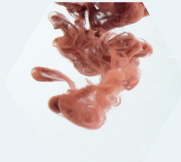

Antioxidant complex technology

Nature longevity secrets

High-tech innovative formulas

Clean & clinical skincare

SCIENTIFIC INNOVATION FOR A BETTER SKIN

Fascinated by the wonders of nature, our scientists have immersed themselves in unlocking the mysteries of the longevity of plants, to extract active ingredients for a lifetime of benefits. We study nature and its active ingredients to help us preserve the skin ecosystem and fight against skin aging.

Thanks to our comprehension of nature and organic chemistry, we have developed exclusive complexes, allowing us to stabilize fragile compounds from plants.

We formulate clean and clinically effective skincare formulas that work. They are the perfect combination of high technology, science and natural botanicals, to fade the traces of time on your skin.

The most exclusive innovative actives to support health professionals, dermatologists, plastic surgeons and our patients in their desire to maintain a healthy, youthful and glowing skin.

COMMITTED FOR A GREENER FUTURE

Recyclable materials

The use of glass and 100% recyclable materials allows us to maintain a clean and environmentally-friendly product life cycle.

Innovative processes

Our production site is ISO-22716 certified and meets the highest French manufacturing standards for the protection and preservation of the environment.

Carbon neutrality 2028

Our goal is to achieve carbon neutrality by 2028. Energy audits are organized each year to quantify the progress and impact of our actions.

Human beings at our heart

An international team focused on sharing, passion and excellence. Our objective : to develop a mixed and multicultural approach to the world of cutting-edge cosmetics.
