Manufacturers of the Award-Winning SkyVac™

SkyVac™ began its humble beginnings in the UK 2004 as a local paving cleaning service. Two separate companies, one by Andy Whiting & Paul Crosbie, combined in 2011 as Spinaclean LTD and soon added Mark Nice.

The trio specializes in external cleaning equipment manufacture & services worldwide. They designed the award-winning SkyVac™ enabling operators to clean 40 ft high safely from the ground.

Fast forward to 2015 and serial entrepreneur, Garrett McAlister, partnered w/ Spinaclean LTD to launch SkyVac USA & Canada headquartered in Raleigh-Durham area of NC. Here we operate a full demo & training facility and a large showroom.

Our rapid growth comes from a customer-focused methodology- enable our customer's success by :

- Offering innovative cleaning systems
- Offering training & diversifying their portfolio
- Enabling their operations & marketing capability

Carry the  bag of Opportunity.

- Improve others health
- Keep your team safe
- Mitigate risks from falling
- Improve productivity
- Separate yourself from your competition
- Reach where others cannot
- Work smarter

See your profits grow.

Combustible Dust:

skyVac™

HIGH-CEILING AND LONG-REACH CLEANING **ATEX** FOR **EXPLOSIVE ENVIRONMENTS**

Explosive atmosphere can contain flammable gases, mists or vapors, or combustible dust. If there is sufficient concentration of these substances, mixed with air, an ignition source can cause an explosion. The SkyVac ATEX system takes away the ignition source.

WHAT KIND OF DUST IS COMBUSTIBLE?

- Cereals
- Flour
- Starch
- Sugar
- Animal feed
- Light metals
- Coal
- Plastics
- Textiles
- and others

Our vacuums are certified for
ATEX Dust Zone 22

Carbon Fiber
Tool Holders

Carbon Fiber Hose
Cuff Connector

Clip free, rapid
pole connecting

- Commercial
- Single Motor
- 35 ft Reach

Roof & Ground Blower Add-On

SKYFLURRY™

The SkyFlurry™ is a dual purpose blower that works side-by-side with the SkyVac to tackle the most difficult gutter cleaning jobs.

The blower rests on the ground and connects to your existing SkyVac flexi hose / carbon fiber vacuum poles. It assists in situations where debris like clingy pine needles have rested or clumped up on the roof. Blowing them off is a much quicker method than trying to vacuum them up.

Also the blower works fantastic for blowing the light, fluffy and dry pine needles and larger sized leaves off the top layer of the gutter or down in the gutter. The SkyFlurry™ is sold as a companion to the SkyVac to speed up certain cleaning scenarios. The trusted SkyVac suction system works best for tackling wet, heavy, sticky and mucky dirt and debris.

Where Gutter
Cleaners Hang Out!

Window Cleaning Systems

SkyVac USA & Canada partners with IPC Eagle to offer Pure Water Window Cleaning Systems and water fed pole technology. This enables a chemical free and safe way for operators to clean high windows and the gutter exteriors safely from the ground.

Surface Cleaning Systems

SkyVac USA & Canada launched the MosmaticPro.com website in 2017 offering a professional avenue for pressure washers and organizations of all types to see, learn & shop for Mosmatic Surface Cleaning, Car Wash and Rotary Union (swivel) technology.

Other Specialty Cleaning

SkyVac USA & Canada distributes an assortment of other specialty cleaning equipment designed to expand our customer's service offerings. We continue to develop and test new equipment products and digital service offerings.

A la Carte Digital & Operational Services

SkyVac USA & Canada can help your business grow. We have packaged pay-as-you grow, integrated, digital services including:

- Digital and Print Design
