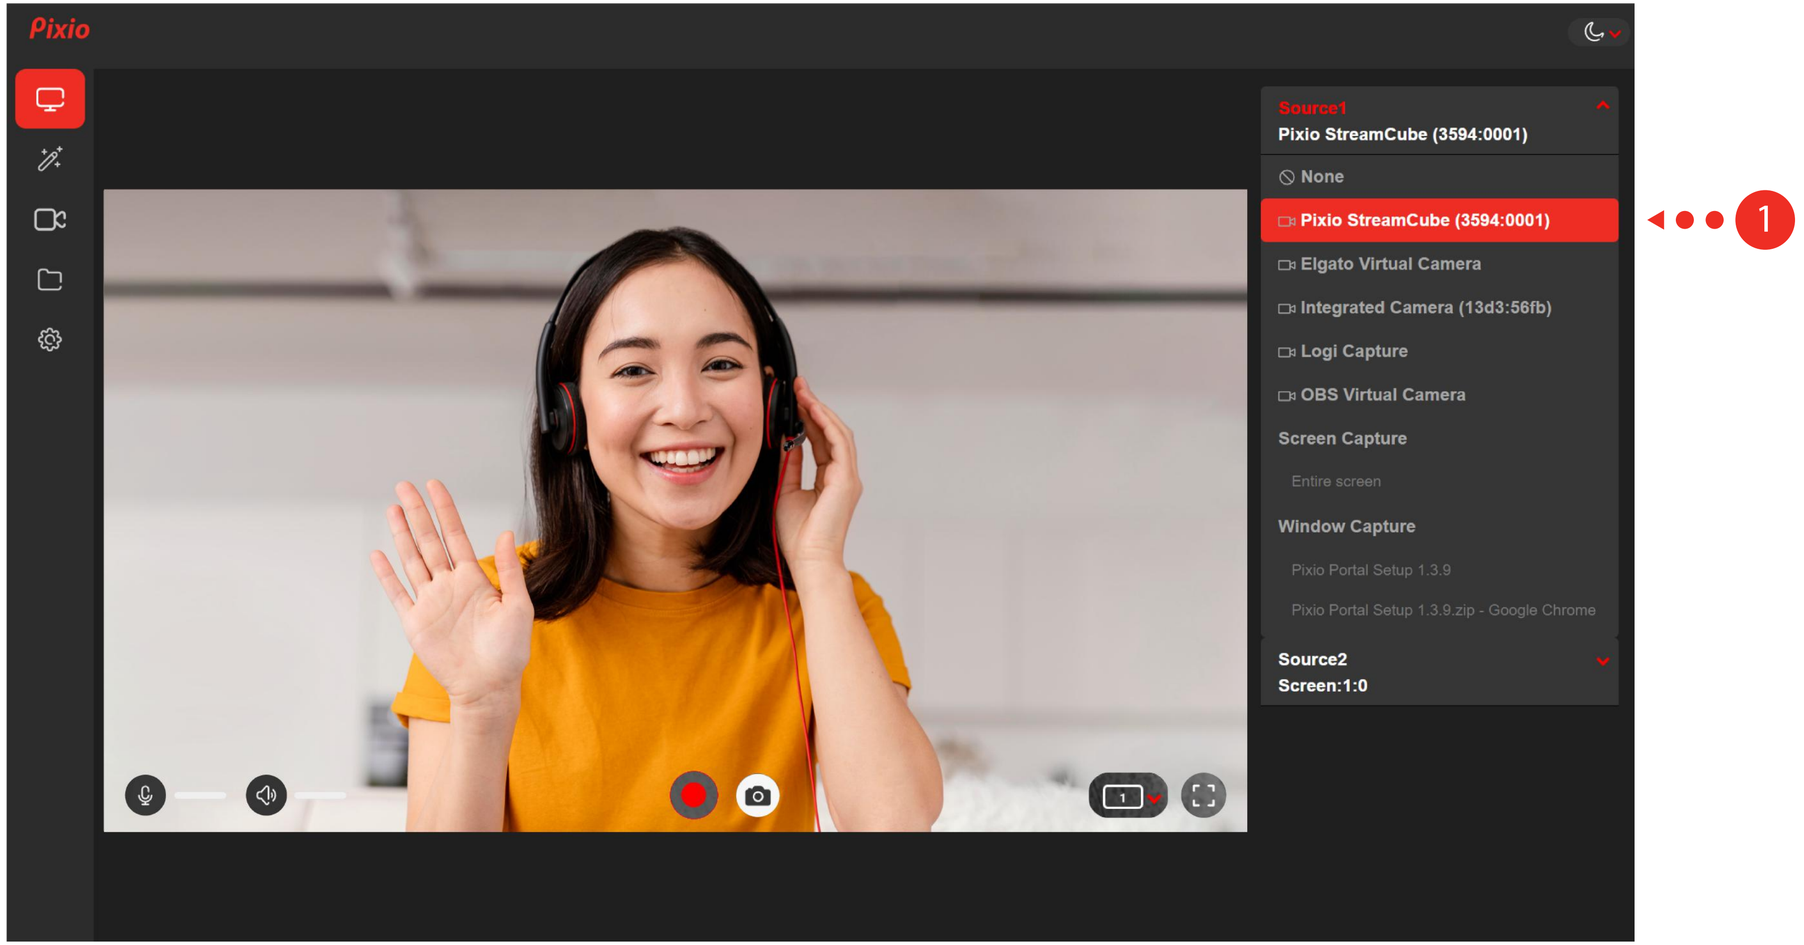
Pixio Portal

OFFICIAL SOFTWARE MANUAL

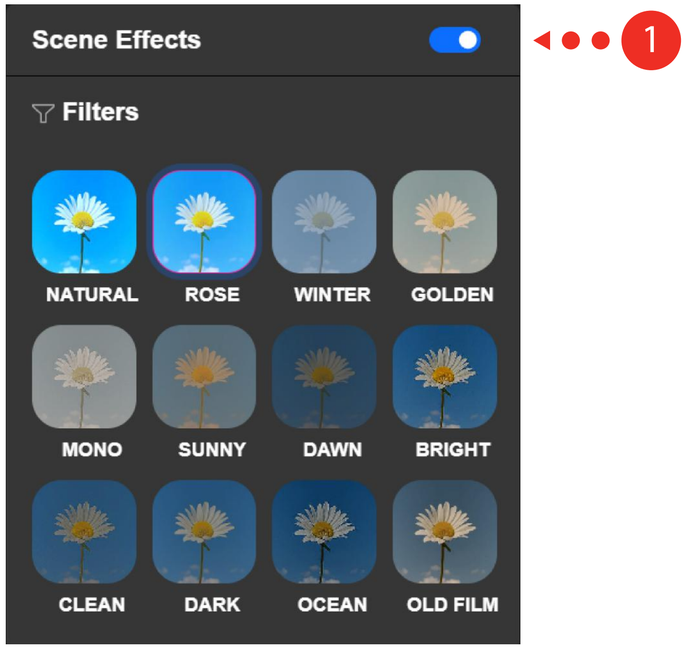
Display

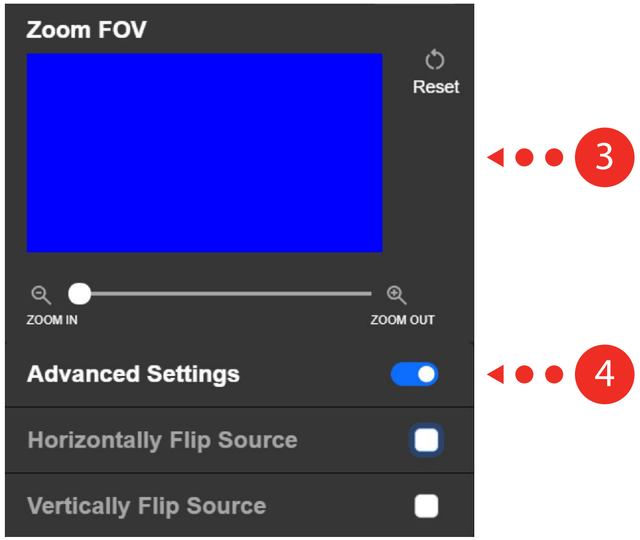
1. Select the “Pixio StreamCube” source to connect your display to StreamCube.



Filters

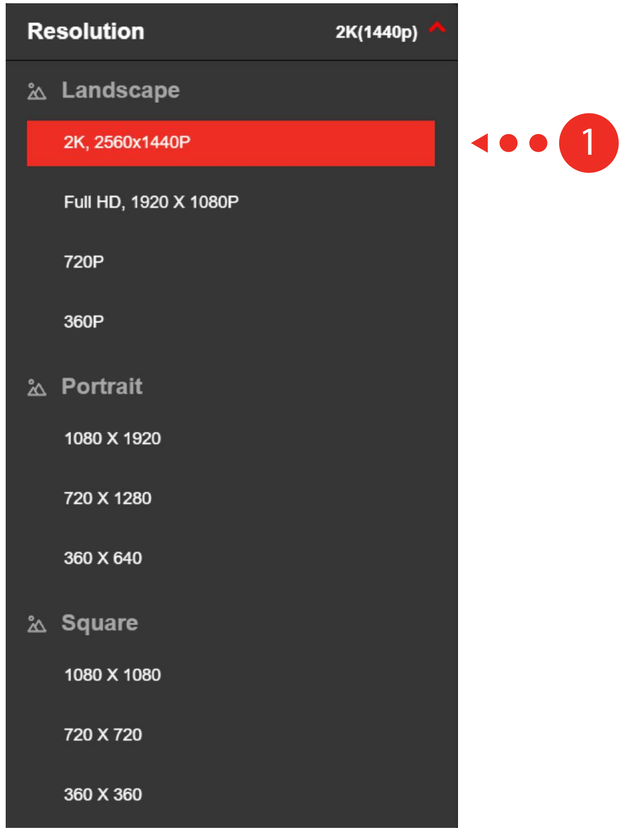
1. Select the “Scene Effects” tab to use any of the 12 pre-made filters.
2. Customize your own filters by using the “Controls” tab.
3. Zoom in/out and choose your focal point by using the “Zoom FOV” tab.
4. Select the “Advanced Settings” tab to flip your source to your desired setting.

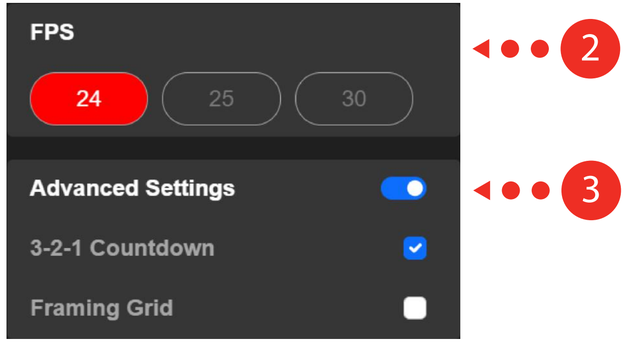


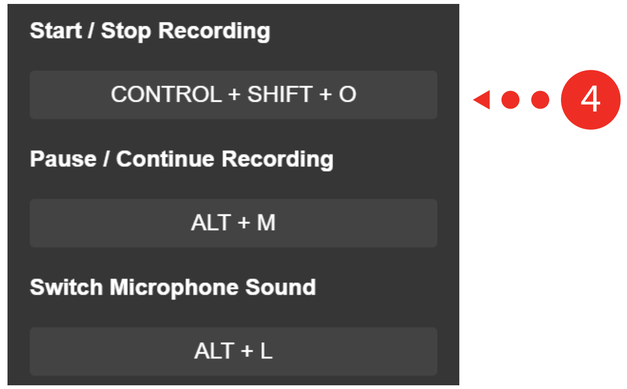


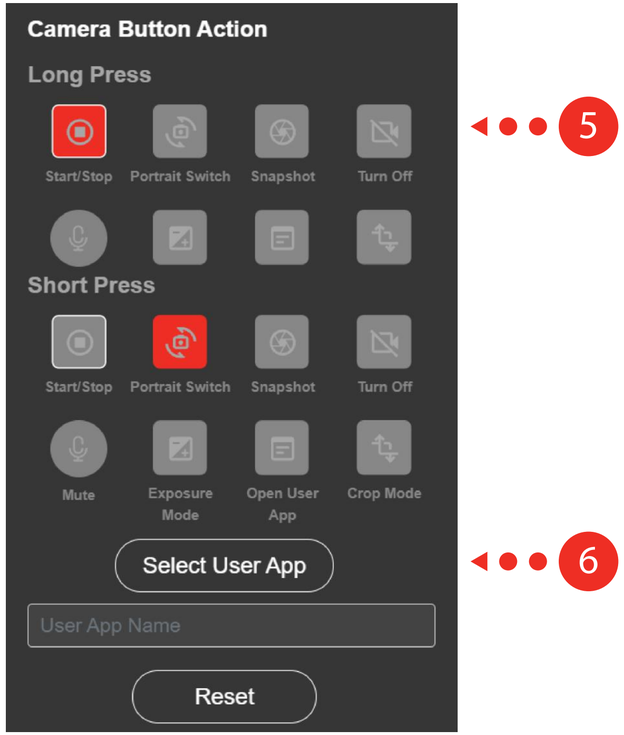
Camera

1. Choose the resolution and the desired camera orientation you wish to use.
2. Choose the FPS you wish to apply.
3. Select the “Advanced Settings” tab to turn on video recording countdown and/or framing grid.
4. Customize your own shortkeys for different functions.
5. Customize the call to action when you press the Pixio StreamCube camera button.
6. You can also customize to open up a specific app downloaded on your computer.



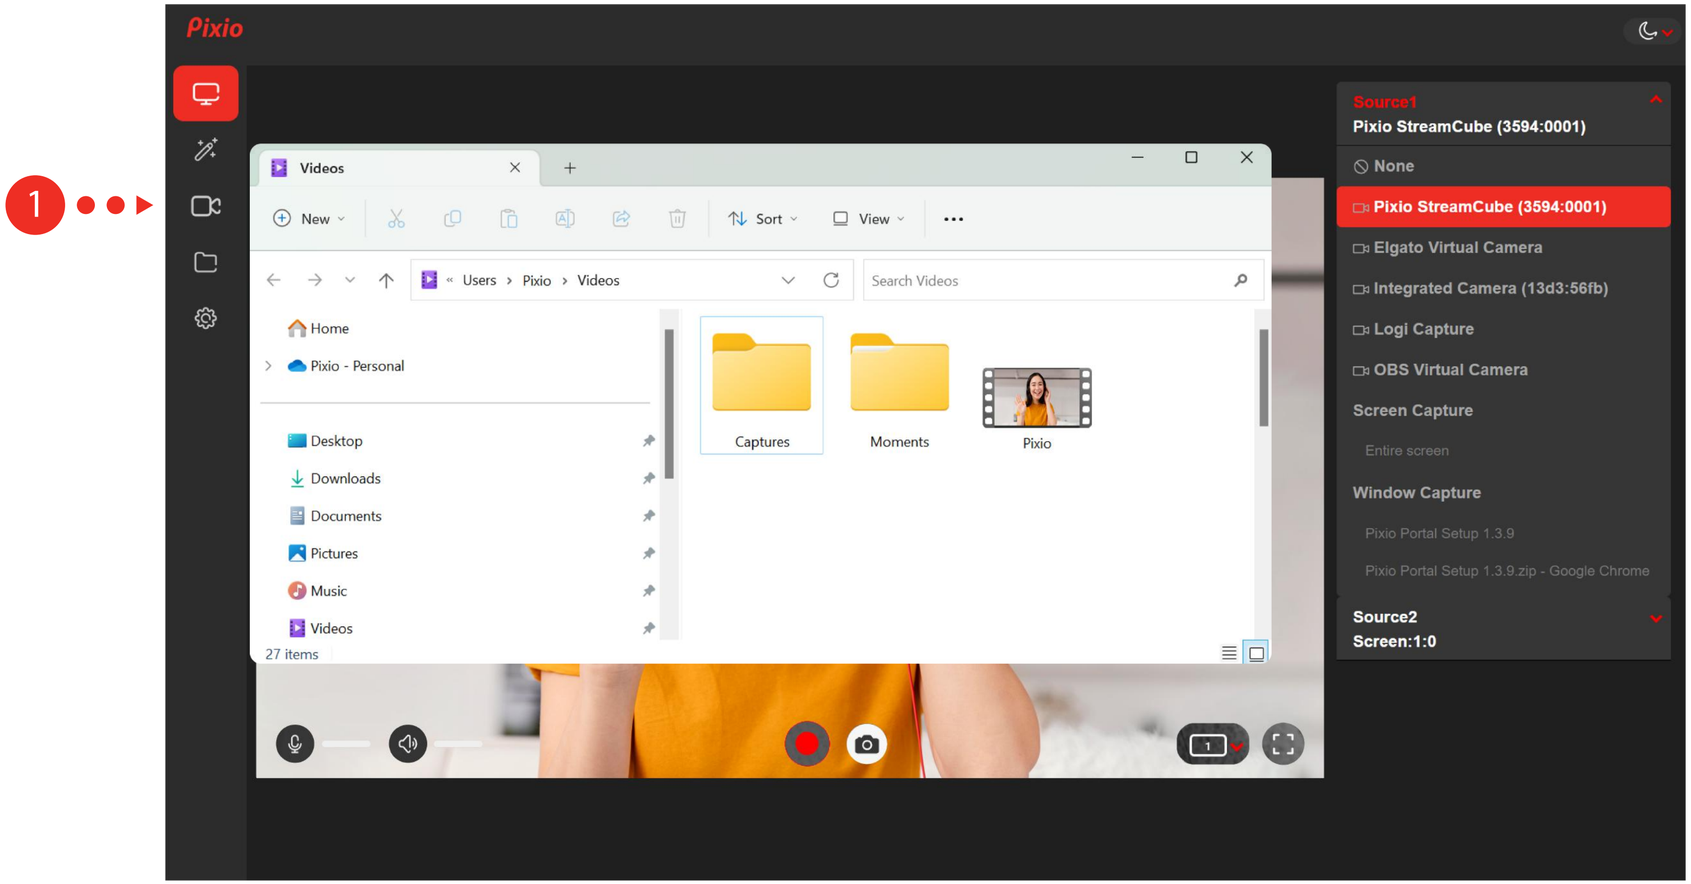






Video Files

1. Select the “Video Files” panel to open up your recorded video files.



Settings

1. Change the color theme to light/dark mode in the “Settings” Panel.
2. Select the “Auto” button to update your Pixio StreamCube automatically.
3. For further questions, visit our Pixio StreamCube support page.
