Dr. Mader Total Relief™ Shampoo & Conditioner
The skin is the largest organ in our body. Our body secretes sebum to moisturize our skin, keeping it hydrated, supple and healthy. People often forget that the scalp is also skin and it needs to be adequately moisturized just like any other part of our body. Sebtheitic dermatitis and chronically dry scalp can also wreak havoc on hair follicles, denying them of the nutrients and oils they need to thrive. This can often result in dull, lackluster hair that just won't grow or even wreck havoc on the follicles to the point that hair begins to fall out. For this reason, Dr. Mader has added coconut oil and hydrocortisone, both of which have been proven to promote hair growth, to the formula of the Total Relief™ Shampoo & Conditioner. dr.maderinc.com
