

# A Smart Home Quick-Start Guide

## SMART APPLIANCES

Control and monitor smart appliances with your smartphone and voice controls.

## SMART SPEAKERS

Listen to music and control the smart devices in your home with your voice.

## SMART SENSORS

Guard your home against fire and invisible carbon monoxide with early detection sensors.

## SMART LIGHTING

Dim the lights, set scenes, and turn lights on and off using voice control or your smartphone.

## SMART HUB

A digital assistant connects your smart devices and lets you control everything with your voice.

## SMART THERMOSTAT

Control and monitor your thermostat with your smartphone and save on energy costs year-round.

## SMART ACCESS

Smart locks and video doorbells provide secure, remote, access for your home.

## SMART SECURITY

Indoor and outdoor cameras, alarm systems, and other smart home monitoring products give you peace of mind.

# MAKING YOUR HOME SMART

## START WITH...

### A SMART HUB

Digital assistants—like the Google Nest Hub, pictured left, and the Amazon Echo Show, shown at right—connect your smart products. These are smart hubs that allow you to control thermostats, lights, door locks, security systems and more with your voice or a smartphone.

Mini

Amazon  
Echo

## CONNECTING YOUR HOME

### 1 GETTING STARTED

Once you choose your digital assistant and connect it to your Wi-Fi, you are ready to start adding smart products.

Digital assistants alone are useful, time-saving tools. Even before you connect other devices, you can use your assistant to keep shopping lists, play music, order products, keep schedules, set timers, watch videos, call friends and much more.

### 2 SMART PRODUCTS

Choose from a wide range of smart products to add to your connected home and improve your day-to-day convenience. Thermostats, televisions, security systems, lighting, appliances, and more can be linked to your hub. That means you can control them with voice commands and monitor stats and usage with your smartphone. Smart appliances and thermostats can save energy and cut down on overall costs.

### 3 MAKING THE MOST OF YOUR SMART HOME

Smart products have a variety of time-saving and energy-saving features. It's worth taking the time to get to know each product and what it can do upon initial set-up.

**TIP:** The more devices that draw on your Wi-Fi, the more demand they place on your bandwidth. Products like Google Wi-Fi increase coverage and spread a stronger signal throughout your home.
