## **LIPO-B WEIGHT LOSS INJECTIONS INFORMED CONSENT**

LIPO-B is a nutrient compound that has proven effective in weight loss programs. There are no safety issues or side effects with LIPO-B injections, as long as you are under the care of a qualified clinic such as a Medical facility. LIPO-B Fat burning injection has proven effective as part of a nutrition oriented weight management plan and may be prescribed as part of your weight loss regimen.

### **BENEFITS OF LIPO BINJECTIONS AND HOW THEY WORK**

Lipotropic nutrients are compounds that help catalyze the breakdown of fat during metabolism. They help promote the flow of fat & bile to and from the liver. In essence, they produce a “decongesting” effect on the liver and promote improved liver function and fat metabolism. Lipotropic formulas are used to help with weight management. Our LIPO-B injections contain important amino acids and nutrients that will help you with your weight loss goals: Methionine, an amino acid that will prevent excess fat buildup in the liver - preventing fatigue. Inositol, a nutrient that aids in metabolism of fats and helps reduce blood cholesterol. Choline, a B-vitamin nutrient that facilitates the movement of fats into the cells. It is essential for the health of the liver and kidneys. Vitamin B-12 (Cyanocobalamin), a nutrient involved in metabolism, energy production & metabolizing fat. Additionally, LIPO-B decreases resistant fat deposits, boosts energy, transforms carbohydrates into even more energy, speeds thought process, helps keep healthy skin tone and strong nails, promotes healthy hair growth, controls estrogen levels, helps control cholesterol levels and gallstones, improves mood, speeds up metabolism and the natural removal of fat in a time released formula.

### **LIPO-B INGREDIENTS**

#### **Methionine:**

Methionine is one of the sulfur-containing amino acids and is important for many bodily functions. It acts as a lipotropic agent to prevent excess fat buildup in the liver and the body, is helpful in relieving or preventing fatigue, and may be useful in some cases of allergy because it reduces histamine release. Methionine works as an antioxidant (free radical deactivator) through conversion to L-cysteine to help neutralize toxins.

#### **Inositol:**

Inositol is a nutrient belonging to the B vitamin complex and is closely associated with choline. It aids in the metabolism of fats and helps reduce blood cholesterol. Inositol also participates in the action of serotonin, a neurotransmitter known to control mood and appetite.

#### **Choline:**

Choline is considered one of the B-Complex vitamins as well as a lipotropic nutrient. It is present in the body of all living cells and functions with inositol as a basic constituent of lecithin. Choline appears to be associated with the utilization of fats and cholesterol in the body. It prevents fats from accumulating in the liver and facilitates the movement of fats into the cells. It is essential for the health of the liver and kidneys.

#### **Cyanocobalamin, Vitamin B-12:**

LIPO-B shots also contain Vitamin B-12 which is involved in metabolism and energy production. It works in concert with the other lipotropic agents to help metabolize fat.

**CONSENT:** By signing below I acknowledge that I have read the foregoing; informed consent and agreed to the treatment. I hereby give consent to perform this and all subsequent LIPO-B injections with the above understood.
