

Bottle Tree display on deck or patio.

To put a bottle tree in a location where you can't put it in the ground, all it takes is a quick trip to the home center and probably a half hour.

Materials:

1-18" deep plastic flower pot

1- bag quickmix concrete

1 to 2 bags of landscape rocks

Brace the tree so that it stands straight up in the pot.

Mix up some concrete in a bucket and put 2" of concrete in the bottom of the pot.

Fill the rest of the pot up to 2" from the top.

Fill the remaining 2" of the pot with concrete.

Once the concrete sets you'll be ready to go.

HINT: Do this near the spot you want to keep the bottle tree because the pot will be heavy.
