

# Oxyfresh for Every Patient

Oxyfresh didn't jump on the alcohol-free bandwagon – we pioneered it. For over 30 years, dental professionals just like you have been recommending our innovative, alcohol-free products to their patients, creating millions of healthy smiles.

Our unique dental formulas are powered by Oxygene®. This brilliant, gentle, 100% non-toxic ingredient neutralizes bad breath on a molecular level while fighting bacteria. It seems like magic, but it's really just great science. Oxygene® is a stabilized form of chlorine dioxide that breaks sulfur bonds (stinky) and converts them into sulfite ions (odor free). Only Oxyfresh products have Oxygene®.

## OXYFRESH DENTAL PRODUCTS ARE FOR EVERY PATIENT

### COSMETIC PATIENTS

Whitening, porcelain and composite patients will love the gentle cleaning, desensitizing and deodorizing benefits of Oxyfresh. We offer a complete line of dye-free, pH balanced, low-abrasion dental products with both fluoride and non-fluoride options. With Oxyfresh, pearly whites stay shining bright and porcelain will keep its luster.

### DENTURE, IMPLANT & SURGICAL PATIENTS

Oxyfresh Dental Gels are a favorite among dental surgeons for their unsurpassed soothing and deodorizing benefits. These unique, fast-acting dental gels contain a therapeutic blend of ingredients, including aloe, chamomile and essential oils, to provide moisture and healing relief. Perfect for patients with new dental implants, stomatitis, burned tissues or chronic odor from removable prosthetics.

### PATIENTS WITH LONG-TERM PERIODONTAL MAINTENANCE

Once your patients transition from acute periodontal care into maintenance, they'll want a simple, at-home system that gives them maximum fresh breath and keeps their smiles like new. With Oxyfresh, you can customize treatment and support for each patient based on their unique needs. This creates a greater chance of successful home maintenance. In addition to individual dental products, we offer the convenience of complete dental kits.

### PATIENTS WHO WANT FRESH BREATH

Always alcohol-free, Oxyfresh dental products are unrivaled at stopping bad breath. All of our toothpaste, mouthwash and gel formulas contain our exclusive ingredient Oxygene® to completely neutralize bad breath. In addition, many of our products “double down” on fresh breath with a **patented combination** of Oxygene® and zinc. The result? True fresh-breath confidence.

### XEROSTOMIA PATIENTS

With multiple medication regimens, auto-immune conditions, and chemo/radiation treatments, patients are experiencing dryness and soft-tissue concerns like never before. The ability to customize the best home care regimen for your dry-mouth patients is vital. Oxyfresh gives you that freedom with products that are free of alcohol, dyes, saccharin and artificial flavors. Additionally, we have options of SLS-free, xylitol, fluoride, aloe and flavor-free.

From cosmetic concerns to surgical support, Oxyfresh is here for you and your patients. Discover what's made us a dentist favorite since 1984.

Oxyfresh®  
SAFE. PROVEN. EFFECTIVE.
