

30 DAY GEL STUDY

# Better Results

More TLC for their smiles.

It's what every patient needs after scaling and root planing (SRP) procedures. That's why a new 30-day published study of 36 chronic periodontitis patients and their clinical improvement using Oxyfresh's powerful Pro Relief Dental Gel as an adjunct to scaling and root planing has captured the attention of dental pros worldwide.

## 36 PATIENTS SPLIT INTO 3 RANDOM GROUPS

### Group 1

(Gel + Tray + SRP)

### Group 2

(Gel + SRP)

### Group 3

(SRP only)

#### Results After 30 Days

50.9%  
reduction in PPD

88.2%  
reduction in PBI

#### Results After 30 Days

47.9%  
reduction in PPD

68.9%  
reduction in PBI

#### Results After 30 Days

27.8%  
reduction in PPD

51.1%  
reduction in PBI

## The Bottom Line

🦷 Pro Relief Dental Gel nearly **DOUBLED** reduction in pocket depth vs. SRP procedure alone

🦷 Applied with trays (2x daily for 10 min., starting day 10), Groups 1 and 2 greatly outperformed SRP alone.†

## Happy Patients, Happy Practice

Fast-acting Pro Relief Dental Gel is unlike any other gel on the market. Uniquely formulated with odor- and bacteria-neutralizing Oxygene®, deodorizing zinc, and a soothing blend of aloe, chamomile & folic acid, it makes a real difference in the periodontal care of your patients.
