

YOUR PATIENTS TRUST YOU WITH THEIR SMILES

Oxyfresh didn't jump on the alcohol-free bandwagon ... We pioneered it!

Since 1984, dental professionals just like you have turned to our exclusive, alcohol-free formulas for safe and effective oral care. With Oxyfresh by your side, you have a **proven system** to give your patients long-lasting fresh breath, healthier smiles, and an exceptional clinical and home-care experience.

What Is The Oxyfresh Difference?

Introducing Oxygene®: a brilliant, gentle, 100% non-toxic ingredient that neutralizes bad breath on a molecular level while fighting harmful bacteria. Oxygene® is a pure, stabilized form of chlorine dioxide that breaks sulfur bonds (stinky) and converts them into sulfite ions (odor free). You won't find Oxygene® anywhere else.

Amazing Benefits

- Clinically-proven **breath management**
- Low abrasion to protect delicate smiles and cosmetic work
- Patented formulas of **Oxygene®** and zinc guarantee the freshest breath possible
- Naturally sweetened with xylitol to fight the formation of plaque and bacteria
- Non-toxic formulas that are safe for the entire family
- **Fluoride** and **fluoride-free** options
- Sugar-free, aspartame-free and saccharine-free
- Dye free to keep pearly whites shining bright
- Alcohol free to protect smiles without burning or dehydrating delicate tissue
- Gentle formulas to complement whitening and long-term periodontal maintenance
- **Exclusivity** - allows for professional guidance and instruction
- Completely **customized products** for a wide range of needs
- Essential oils for a fresh, clean feeling without an aftertaste

When you choose Oxyfresh, you can have complete confidence in delivering quality care and results with every treatment plan.
