

INTRODUCING OUR UNIQUE AND EXCLUSIVE INGREDIENT ...

Some might say it's "one ingredient to rule them all." We just think it's great science. Why cover up odors when you can safely neutralize them? Introducing our unique and exclusive Oxygene®: a brilliant, gentle, 100% non-toxic ingredient that neutralizes even the toughest odors on a molecular level. It's time to start cuddling.

HAPPY SMILE, HEALTHY PET

We all want more quality years with our pets. That's why Oxygene® is such a game-changer. Sure, this amazing, non-toxic ingredient eliminates bad breath, but even more important, it's the first line of defense against periodontal disease, which can take years off a pet's life. By fighting bacteria, Oxygene® effectively cleans the teeth and gums each day, reducing plaque and tartar buildup.

Paws down, Oxygene® is the safest, most effective way to stop pet bad breath and plaque buildup without harsh chemicals, alcohol, additives, xylitol, mints, clove oil, tea tree oil or masking agents.

FRESH FROM HEAD TO TAIL

Why stop at their smiles? That's the question we asked after seeing the difference Oxyfresh dental care products were making in the lives of pets and their people worldwide. So we went back to the lab and formulated a **complete line of pet care products** with Oxygene®: Pet Ear Cleaner for fresh, itch-free ears; Pet Shampoo for a clean, beautifully conditioned coat; and Pet Deodorizer to eliminate odors anywhere they're a problem. **Use. Cuddle. Repeat.**

THE BEST OF THE BEST

Oxyfresh's innovative pet care products with Oxygene® are specially formulated to keep furry friends happy, healthy and smelling their best.

- Safe** – Oxygene® is safe for everyone in the family ... tail or no tail!
- Tasteless and Odorless** – Even the pickiest pets can't detect our secret ingredient.
