

Quick Guides | TOOTHPASTES

Extraordinary Toothpaste for Total Fresh-Breath Confidence

Oxyfresh has carefully formulated three unique, professional-grade toothpastes, all featuring our exclusive ingredient Oxygene®. This brilliant, safe-for-families, gentle and non-toxic ingredient completely neutralizes volatile sulfur compounds (VSCs) on contact, the molecules that cause bad breath. The result? Fresh breath and a healthier smile ... every time.

Oxyfresh toothpastes are super concentrated and last up to 4x longer than store brands! They contain only the good stuff: no dyes, artificial flavors or colorings. And ... they're low-abrasion to protect white, bright smiles and dental cosmetic work!

Formula	Dye-Free	Essential Oils	Xylitol	Fluoride (NaF)	Freshens Breath	Low Abrasion (gentle)	Neutralize VSCs	SLS Free
