

# NUTRI-LIFE MYCO-FORCE™

Repopulate the soil with naturally occurring, beneficial fungal species

*Beauveria bassiana*, *Lecanicillium lecanii* and *Metarhizium anisopliae*.

## KEY PERFORMANCE

- A powerful probiotic
- Product can be used right up to harvest
- Based upon naturally occurring fungi
- Applicable at all developmental stages

## GROWTH STAGE

- ✓ Pre-planting
- ✓ Planting
- ✓ Vegetative Growth
- ✓ Pre-flower, Flowering, Fruit Set & Fill

## SIZES:

1 kg, 5 kg

## PRODUCT CODE:

NLMF

**ACO Certification No. 456**

## COMPOSITION:

Contains the species *Beauveria bassiana*, *Metarhizium anisopliae* & *Lecanicillium lecanii*

# NUTRI-LIFE MYCO-FORCE™

## APPLICATION RATES

### Soil Application

---

1 – 2 kg/ha

---

### Soil Drenching (for small areas with a watering can)

---

5 g/L of water

---

**Note: Initial frequent applications may be required to established beneficial soil fungal populations, however for routine use allow 2 weeks between applications.**

## INSTRUCTIONS

This product requires sieving when applied with sensitive spray equipment. Prior to application, mix Myco-Force™ with water to make a slurry at a rate of 1 kg/10 L. Stir/agitate constantly for 2 minutes then stand for 1 hour. Screen if required, then add to fertigation or spray tank. Screen sizes finer than 125 microns (120 mesh) are not recommended.

Microbial inoculants should be applied as close to the target area as possible: i.e., seeds, roots or soil. Do not apply in direct sunlight or in very dry conditions. Soil applications should be applied just prior to a rain event or irrigation (or during light rain events) to ensure successful inoculation.

Ensure compliance with your quality assurance code of practice regarding the use of microbial products before use.

## IMPORTANT

Do not use near silkworm or honey bee breeding.

Contains live organisms. Do not mix with fungicides/ bactericides, toxic chemicals or soil fumigants. Sanitise spray tank before application.

All microbial products should be added to the tank last after all other inputs have been diluted. Ideally, apply in the late afternoon. Do not exceed 60 psi.

Wash hands after use. Avoid applying close to harvest if produce is susceptible to staining.

## STORAGE & HANDLING

Read safety directions before use.

Immuno-compromised persons (e.g. those undergoing chemotherapy) should not handle or be exposed to microbial products. While handling, brewing and applying microbial products protective clothing, gloves and face masks should be worn.

Contains live organisms. Avoid aerosols generated by aeration. Store in cool, dry place away from sunlight and below 30°C (preferably under refrigeration). Use as soon as possible after opening but if this cannot be achieved then refrigerate remainder immediately after use and use within 3 months.

Contamination of contents may occur at any time after opening and NTS takes no responsibility for opened product not used immediately. DO NOT FREEZE.

\*Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing, application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The Buyer assumes all responsibility for the use of any NTS products.
