SAFETY SIGNS

Usage Guide & Material

Safety Signs are an essential tool to promote safety in the workplace by warning everyone about potential hazards and educating them about the proper safety practices. There are many types of industrial Safety Signs that are suitable for both indoor and outdoor working areas. Some examples are Caution Signs, Warning Signs, ANSI Signs, CSA Signs, Bilingual Signs, First Aid Signs, General Safety Signs, Chemical, HazMat Signs and many more.

 <p>“Are designed for use where major hazard situations present an immediate threat of death or serious injuries.”</p> <p>Source: ANSI spec Z535.4.4.14.1.</p> <p>Consult local regulations for specific guidelines</p>	 <p>“Are designed for use where hazard situation that, if not avoided could result in minor or moderate injuries.”</p> <p>Source: ANSI spec Z535.4.4.14.2.</p> <p>Consult local regulations for specific guidelines</p>	 <p>“Indicate hazardous situations that, if not avoided, could result in minor or moderate injuries.”</p> <p>Source: ANSI spec Z535.4.4.14.3.</p> <p>Consult local regulations for specific guidelines</p>	 <p>“Indicates information considered important, but not hazard related.”</p> <p>Source: ANSI spec Z535.4.4.14.4.</p> <p>Consult local regulations for specific guidelines</p>	 <p>“Indicates a type safety sign, or separate panel on safety sign, where specific safety-related instructions or procedures are described.”</p> <p>Source: ANSI spec Z535.4.4.14.5.</p> <p>Consult local regulations for specific guidelines</p>
--	--	---	--	---

ANSI

ANSI format signs offer a great way to communicate critical health and safety information in your workplace. These signs display hazards and safety information in a consistent manner for effective communication. ANSI signs include information in both text and visual pictogram to reinforce the message.

CSA

The CSA format signs are the Canadian Standard Association (CSA) way to communicate health and safety information. These signs incorporate a worded message that is reinforced with standardized graphic pictograms, making this selection a great choice.

ISO

The internationally recognized symbols for these signs communicate information and safety tips to anyone around your workplace. These signs meet ISO (International Organization for Standardization) standards for symbols and colours.

Safe Viewing Distances

Danger and Warning signage conveys critical information to warn of potentially hazardous situations and conditions. These signs need to be sized appropriately to ensure clarity of the warning at various safe viewing distances and still have time to follow the sign's message and avoid the danger.

This requires adjusting the size (height) of the letters for both the Signal Word and the Message Text in relation to the distance from which the sign will be safely viewed. The ANSI Z535.2 (2011) Standard provides a formula to determine these dimensions. The Signal Word should be 50 percent greater in height than a capital letter H in the message text.

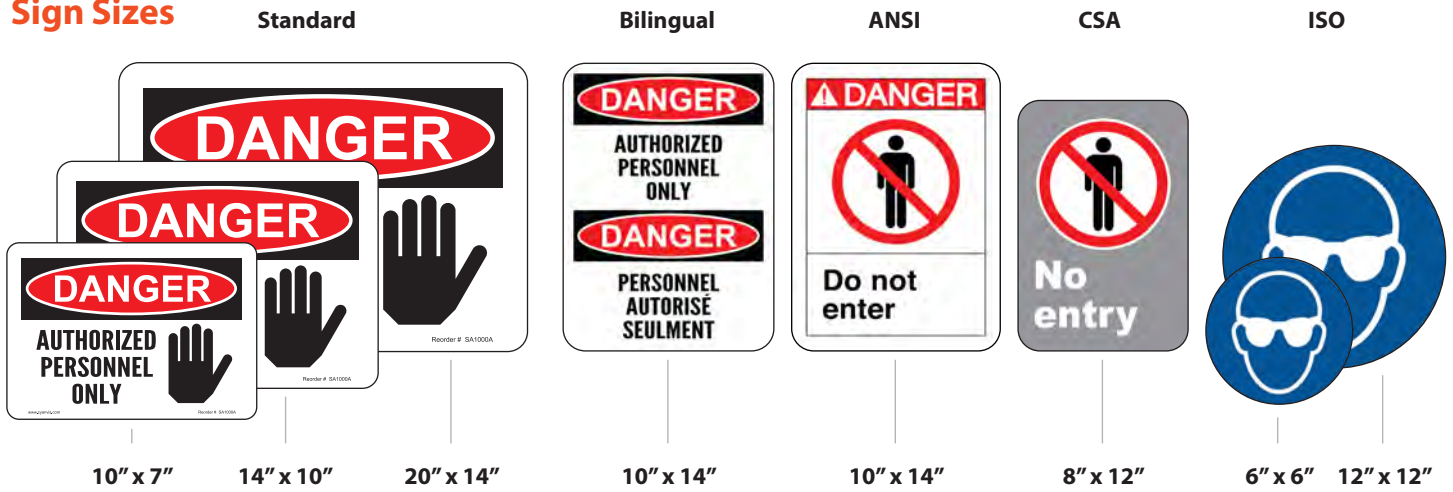

The ANSI Z535.2 (2011) Standard also has calculations for slightly larger letter heights for unfavourable viewing conditions such as low lighting; for warning people at a greater distance than the safe warning distance; or for people with difficulty reading small text such as senior citizens.

Safe Viewing Distance (ft.)	Min. Letter Height (in.) - MESSAGE TEXT	Min. Letter Height (in.) - SINGAL WORD
6'	0.24"	0.48"
10'	0.40"	0.80"
20'	0.80"	1.60"
60'	2.40"	4.80"
100'	4.00"	8.00"

Viewing Distance	25'	40'	50'	75'
Sign Size	10" x 7"	8" x 12"	10" x 14"	14" x 20"

Sign Sizes

Sign Materials 3M

V Vinyl

Our adhesive vinyl signs have a permanent adhesive backing and may be used both indoors and outdoors. Typical outdoor usage is 7 years. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

A Aluminum

Aluminum signs are made from a rigid 0.060" thick stock for smaller signs, or a robust 0.081" stock for the larger format signs. These signs are intended for longer term outdoor usage. Typical outdoor usage is 7 years. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

P Polythlene, Semi-Rigid PVC

This is a semi-rigid 3mm thick sign with radius corners and 4 mounting holes. May be used both indoors and outdoors. Typical outdoor usage is 5 years. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

M Magnetic

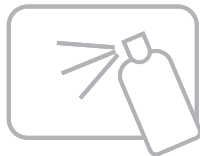

These signs are manufactured on a thick 0.030" Magnetic Vinyl that will adhere to metal surfaces. Easily removed and reapplied as needed, this material is flexible enough to mount on curved surfaces. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

All of Our Signs Are:

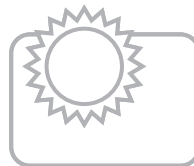

✓ Scratch Resistant

✓ Graffiti Resistant

✓ UV Resistant

✓ Chemical Resistant

✓ 3M Best-In-Class Material

✓ Can Be Used Both Indoors and Outdoors

✓ Abrasion Resistant

✓ Standards Compliant (OSHA, ANSI, CSA, ISO)

Sign Appearance

Located at the top of every safety sign is a header, pertaining to a level of hazard. Below is a simple message and graphic, with quick instruction. Our safety signs have rounded edges for maximum safety and have 3/8" diameter drilled holes for mounting. The order number of every sign is located in the bottom right hand corner, as well as our website in the bottom left.

Danger Safety Signs

"Are designed for use where major hazard situations present an immediate threat of death or serious injuries."

ISO Safety Signs

The internationally recognized symbols for these signs communicate information and safety tips to anyone around your workplace. These signs meet ISO (International Organization for Standardization) standards for symbols and colours. Available in 6" or 12" sizes and made from adhesive Backed Vinyl, Semi-Rigid Polyethylene Plastic, Aluminum or Magnetic.

Mandatory Take action to avoid the hazard

Prohibited Forbid an action to avoid the hazard

Warning Identify the hazard to avoid

Custom Printed Safety Signs

Full Colour

YOUR NAME, YOUR COLOURS, YOUR BRAND.

Custom Printed Safety Signs

Cannot find the safety sign you need in our off-the-shelf stock? Let us help you create the exact sign you need for your application.

Our sign production capabilities offer a wide range of design, print and finishing options. With our state-of-the-art digital printing, we are able to produce cost effective, rapid delivery signs to meet the needs of any application.

Email us at info@cyanvis.com to see what we can do for your next sign requirement.

1

Material

Select a sign stock from our wide selection of materials to suit your needs and price point. We can provide a material ideally suited for Indoor use, Outdoor use, Daylight and Night-time Visibility, High durability requirements, Recyclable needs, Temporary and long term use.

V Vinyl

Our adhesive vinyl signs have a permanent adhesive backing and may be used both indoors and outdoors. Typical outdoor usage is 7 years. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

A Aluminum

Aluminum signs are made from a rigid 0.060" thick stock for smaller signs, or a robust 0.081" stock for the larger format signs. These signs are intended for longer term outdoor usage. Typical outdoor usage is 7 years. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

P Polythlene, Semi-Rigid PVC

This is a semi-rigid 3mm thick sign with radius corners and 4 mounting holes. May be used both indoors and outdoors. Typical outdoor usage is 5 years. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

M Magnetic

These signs are manufactured on a thick 0.030" Magnetic Vinyl that will adhere to metal surfaces. Easily removed and reapplied as needed, this material is flexible enough to mount on curved surfaces. All signs come standard with scratch-resistant, UV-resistant, abrasion-resistant and anti-graffiti protective layer.

2

Size, Shape & Style

We can manufacture your signs in the industry standard sizes; or unique shapes to fit your application. Is your sign intended for safety, information, or motivational purposes?
