

Installation: Pivot-EZ w/"Clear-Vue" Feature

Installer: Chris Bravo

Unit: 2000 Alpenlite

I purchased a used Excel 5th wheel in 2007 that had the Pivot EZ installed. My first thought was, what is this thing...but after using it for the first time my second thought was...this is nice. It makes the setup of the waste hoses easy and convenient, especially at the dump station. I now own an Alpenlite and when the Pivot EZ became available to all RV's I purchased the first one and it's now installed on my unit. The universal mounting brackets installed easily and allows for various adjusts to ensure a proper fit. My third thought is, I'm glad I did it
