Step 1: Make sure that the dimensions of the cut-out correspond to the measurements indicated in the technical drawing received with your fireplace.

Step 2: Connect the fireplace to a source of electricity.

Step 3: Recess the fireplace into the wall cut-out according to the indications in the User's manual.

Step 4: Place the glass screen/s on the top plate by fitting the pin holders into the holes.

Step 5: Turn on the fireplace. Fill in the right amount of bioethanol by verifying the level on the indicator.

Step 6: Start the fireplace by pressing the Play/Start button on the control panel.

Enjoy your fire.

1. Download and install the DecoFlame App by scanning the QR code above corresponding to your smart device's operating system.

2. In order to pair your fireplace with your smart device, start the fireplace by pressing the 'ON' button.

Start the App and choose your fireplace. Insert the code from YOUR rating plate, like the one highlighted above.

3. Once your device is paired, the fireplace should be visible on the app. You are now able to change the name of the fireplace.

Note: You are able to pair more than one fireplace like described in the step nr. 2 and give them different names.

4. Once you have selected your fireplace, you can turn it on by pressing 'START'. If the fireplace has already been turned on using the control panel, you can now monitor the fuel level and the consumption.

5. For the 'Turn Off Timer' press the clock icon in the lower right corner. To adjust the remaining time, slide the dot to the left and right and select 'SET TIMER'. The remaining burning time can be changed by repeating the above mentioned steps. To cancel the timer select 'CLEAR TIMER'.

6. For adjusting the flame intensity, select the desired level on the left side of the screen. (1-lowest, 6-highest) Should there not be enough fuel for the selected burning time - the fireplace will shut down automatically. Select 'STOP' to turn off the fireplace.
