FIBREGLASS MEDIA FILTERS

High performance filtration
for residential and small
commercial pool and spas

Faster backwashing,
less water used

Improved pool filtration

FG FIBREGLASS FILTER

The FG fibreglass sand filter has been designed to provide high performance filtration for residential and small commercial pools and spas. Using the technology and expertise of AstralPool, the worlds largest commercial filter manufacturer, the FG series is designed to meet today's demands of modern pool systems. Every part of the filter has been designed to match high performance pumps and enhance the pump performance, allowing faster filtration using less energy.

CRYSTAL CLEAR WATER

AstralPool FG Filters produce crystal clear water using fine sand or glass as the filter medium. With a large capacity and higher flow rates, this enables the pool water to be filtered more effectively in a shorter period of time, saving on operating costs. They also make the FG Series perfect for in-floor cleaning system.

MULTI-PORT VALVE

The 6 position multi-port valve ensures positive fitting and alignment of pipe work with no special tools required. Self sealing barrel unions allow quick disconnection for inspection and changing the media. conditions.

WARRANTY
