

Elevation Boot

The effective moisture & pressure reduction solution.

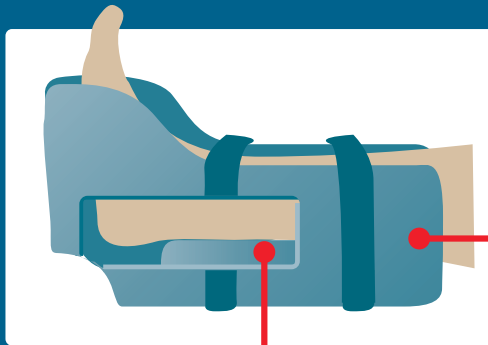

LATEX FREE

Non-slip bottom

- Product provides immediate moisture control as well as cushioning support to lower leg and foot area
- Extra layers of fabric underneath the calf allows for heel elevation and pressure relief
- Product will keep the skin at a regulated temperature which will eliminate the likelihood of skin breakdown
- Product will eliminate odors generally caused by excess humidity
- Dri-release fibers found inside the product will effectively attract and expel moisture 4 times faster than regular fabric.
- The 3-dimensional structure inside the product allows for air circulation inside the product
- Open heel promotes airflow, and makes heel visualization easier
- Soft nylon exterior increases patient mobility
- Non slip bottom
- Adjustable straps are soft against the skin
- Fabric Content: 90% Polyester 10% Cotton
- Washing temperature 160 – 167°F (71 – 75 °C)
- * Drying Temperature 220°F

Ventopedic™ all around, inside and out. Does not contain foam, gel, or plastic

Extra layers of Vento Air Fabric under calf allows heel to be suspended and protected
