

Elevation Boot with Drop Foot Strap

The effective moisture & pressure reduction solution.

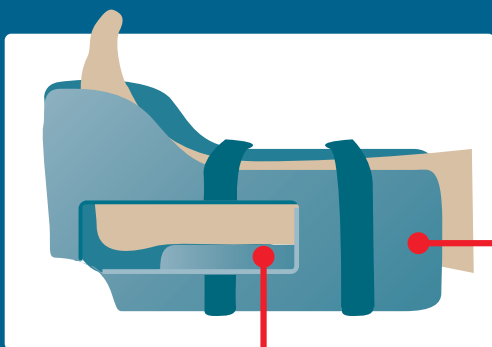

- Controlled levels of hydrophobic and hydrophilic fibers attract and expel skin moisture four times faster than regular fabric
- The 3-dimensional structure inside the product allows for air circulation inside the product
- Product provides immediate moisture control as well as cushioning support to lower leg and foot area
- Extra layers of fabric underneath the calf effectively offloads the heel
- Product will keep the skin at a regulated temperature which will eliminate the likelihood of skin breakdown
- Product will eliminate odors generally caused by excess humidity
- Open heel promotes airflow, and makes heel visualization easier
- Soft and breathable nylon exterior slides smoothly over bed sheets
- Non slip bottom
- Adjustable straps are soft against the skin
- Fabric Content: 90% Polyester 10% Cotton
- **Machine Washable**
Washing temperature 160 – 167°F (71 – 75 °C)
Drying Temperature 220°F
- Product is available in Small, Medium, Large, and Bariatric sizes
- Product can be used on left or right feet

LATEX FREE
