

INVACARE®

MyOn™ Active Wheelchair

Yes, you can.™

The **Invacare® Myon™ Active wheelchair** is a comfortable, foldable, lightweight wheelchair, that is ideally suited for everyday use. Key features of this wheelchair are increased center of gravity positioning and increased seat depth and seat width. It is a shared platform with other models in the MyOn family which means that therapists and dealers can maximize opportunities for modularity and personalized adjustments for the end user.

Highlights

- A dual crossbrace design adds frame stability, resulting in easier wheeling and better utilization of the user's body movements. Optional adaptable seat depth and seat angles to ensure that each user obtains the necessary postural stability and support.
- Almost all parts on the MyOn Active frame are interchangeable with other Myon chairs. All parts such as armrests, legrests, wheels are compatible with each other.
- Choice of an active or passive rear axle position allows the dealers and therapists to customize the centre of gravity.
- MyOn Active also comes in a Heavy Duty version with a user weight of 350 lbs, which offers flexibility in a chair to suit almost everyone.
