Wound Cube Gen2

Product Overview

Wound Cube™ Gen2 - is the ultimate wound simulator for bleeding control training. Our innovative design features five large, realistic wound patterns carefully crafted into a transparent, soft silicone cube. Our see-through technology accelerates the students understanding of proper wound packing.

Additional Info

Our state-of-the-art Gen2 Cube is engineered to optimize training efficiency in any classroom setting.

The Wound Cube™ is an excellent task trainer for TCCC, TECC, TEMS, PHTLS, and Stop the Bleed.
