

NAIL SHADOW

APPLICATION METHOD

If applying nail shadows over the entire nail we recommend the below method for best results and durability.

1

Complete all regular nail prep and apply your enhancement of choice (gel polish, builder base, builder gel or acrylic).

2

Finish the nails with one coat of **NO WIPE TOP COAT**. Only no wipe top coat can be used with NAIL SHADOWS. We recommend top coating and curing the nails 2-3 at a time for best results.

3

Using a small amount of NAIL SHADOW powder on the sponge applicator buff the powder into the nail in circular motions. Ensure all powder is buffed very well into the nail. Using a soft dust brush lightly remove any excess powder. **REPEAT STEPS 2 and 3 until all nails are covered.**

4

If you are covering the entire nail in NAIL SHADOW powder we recommend lightly filing the free edge of the nail with a 240-grit file to remove the powder from the very edges. This will aid in base and top coat adhesion.

Now apply a layer of our gel polish **BASE COAT** to the entire nail. **ENSURE ALL EDGES ARE FULLY CAPPED.** Cure the nails as normal.

5

Apply 1-2 layers of **NO WIPE TOP COAT** to each nail. **ENSURE ALL EDGES ARE FULLY CAPPED.** Cure as normal.

NOTE: For longevity 2 coats of **NO WIPE TOP COAT** are advised.

6

Finish your treatment with a drop of **BIO CUTICLE OIL** applied to each nail massaging into the cuticle and nail to moisturise.
