BONE

USER MANUAL

ver. 1.1

READ THIS MANUAL CAREFULLY BEFORE
INSTALLING AND USING YOUR LILLAGUNGA BONE

NOTE This manual guides you through the installation and use of your Lillagunga Bone to a ceiling.

NOTE This product is intended for indoor use. Please refer to "outdoor use" for more information.

NOTE This package does NOT include curl hooks, unless separately ordered.

NOTE This product is intended for home use. The trapeze shall be used by one (1) person at a time.

NOTE This product is NOT intended for children under 3 years of age.

NOTE The maximum permitted capacity is 90 kg.

WARNING! We do not take ANY responsibility for possible accidents or damage caused by failure or neglect to follow, or misunderstanding this manual.

REQUIRED TOOLS

Power drill and a drill bit

Type and size dependent on hook model
and ceiling material

Pencil

Ladders, a tall chair or similar to reach the ceiling

Measuring tape

WARNING! Do not place the trapeze near an open fire or other sources of strong heat, such as electric bar fires, gas fires etc due to the risk of fire.

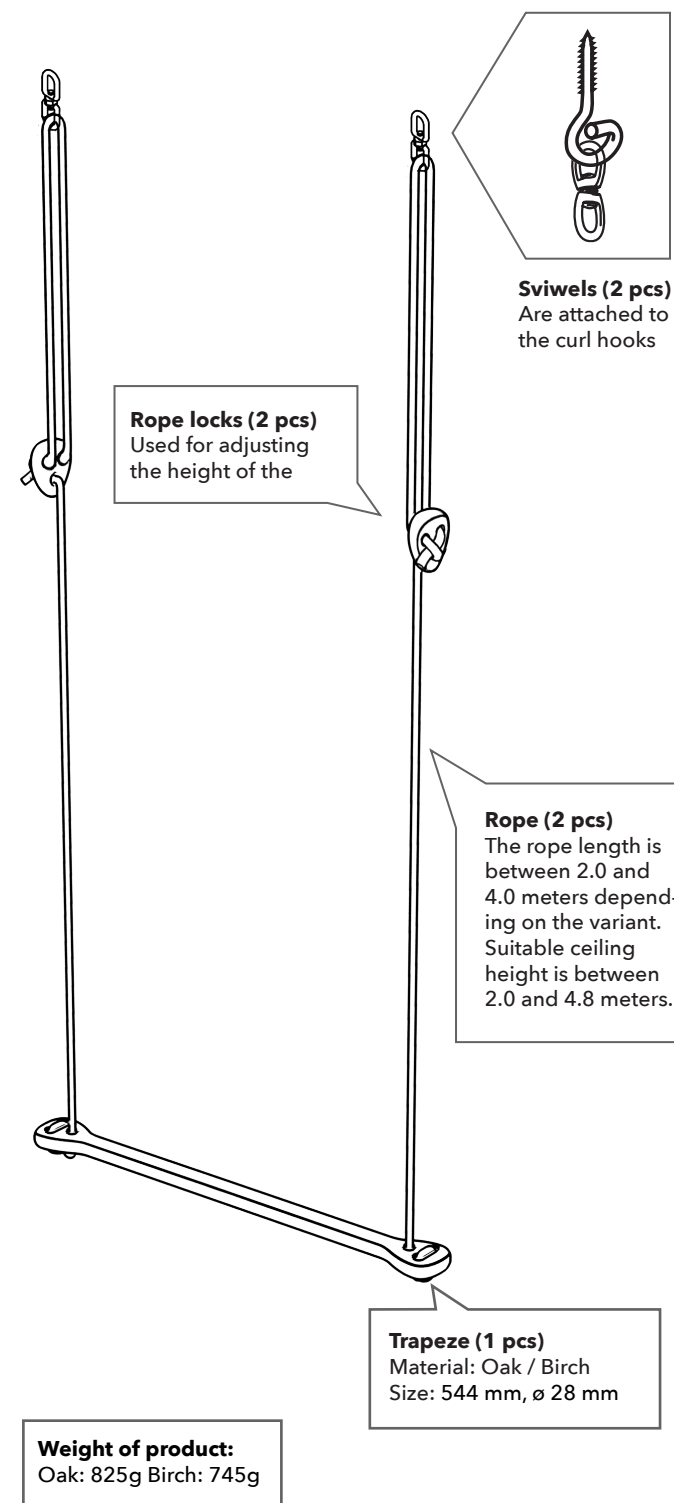

WARNING! Avoid placing the trapeze over hard floor ground materials such as asphalt, concrete or glazed tile. Use softening materials to reduce impact in case of an accident.

INSTALLATION

1. We recommend to reserve two (2) meters in front/behind, and on both sides of the trapeze.
2. Use the ladders to reach the ceiling. Make sure that the ladders are stable and stand firmly, drilling vertically may distract your balance.
3. Use a measuring tape and mark two points at 48-50cm apart from each other. Drill two holes, and screw the hooks into the ceiling.
4. Rotate the ends of the curl hooks pointing to the side.
5. Make sure that both hooks are tightly in place.
6. Test before use.

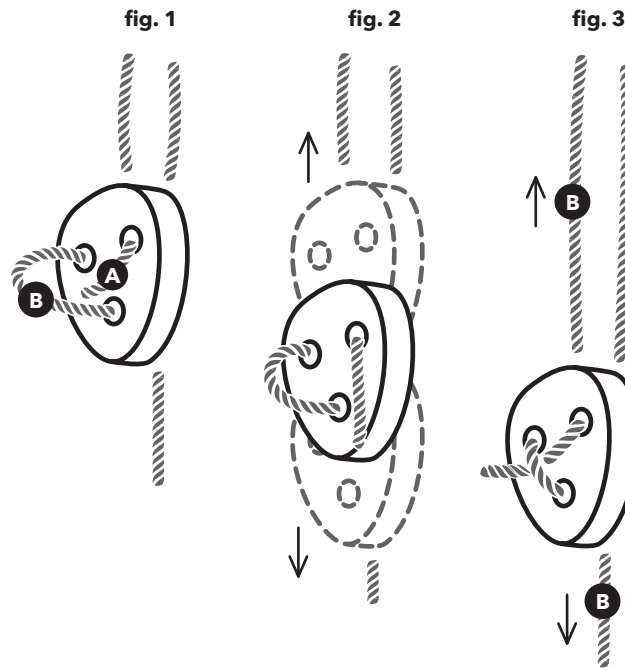

NOTE If you have purchased Curl Hooks from Lillagunga, please follow the instructions that come with the package.

WARNING! Ensure that the hooks will be attached to a bearing part of a ceiling. Consult an expert in uncertainty.

ADJUSTING HEIGHT

1. Loosen the knot of the UPPER ROPE LOCK by pulling up the rope (A) end (fig. 1). Do NOT use the lower rope locks for height adjustment.
2. Slide the rope lock up and down to adjust (fig. 2)
 - a. To raise the trapeze: move the rope lock down by sliding the looped rope (B)
 - b. To lower the trapeze: move the rope lock up by sliding the looped rope from
3. Once the height is adjusted pass the loose end (A) back under the loop, and tighten the knot by pulling the rope (B) in opposite directions (fig. 3).

MAINTENANCE AND SAFETY

The trapeze must be inspected once a month

- All parts shall be inspected on a regular basis as they may become safety risks if damaged or worn out.
- If a fracture (clearly visible to the eye) is identified in a rope lock, remove and replace it.
- Inspect the ropes by sliding your palm gently over the ropes. If the rope is damaged or torn, the braid may loosen up. Remove and replace.
- If a part gets worn out or damaged stop using the product immediately and replace it to a new original Lillagunga part.

NOTE

A careful use and maintenance of the product according to this manual will extend the lifetime of the Lillagunga Bone, and prevent possible accidents.

OUTDOOR USE

This product is intended for indoor use. Outdoor use is at own responsibility with the following guidance:

- The trapeze must always be placed under shelter, properly protected from rain.
- Sun, rain and moisture will eventually cause changes in materials. These may appear as color changes, fractures or slight change in shape (particularly the wooden parts).
- Outdoor use weakens all parts and thus shortens the lifetime of the trapeze. As outdoor conditions are very varying our warranty applies only for indoor use.
- If the trapeze is being used outdoors, always take it indoors when not in use.

NOTE

This package does not include components or parts that enable the attachment of the rings to a tree or to branches.

SAFETY IN MIND

Safety shall always be taken very seriously

1. Do a routine check of the trapeze before use. See Maintenance and Safety.
2. Ensure that the knots are properly in place and tightened. A modified knot is a serious risk.
3. Always use softening material under the trapeze.
4. Ensure that the ropes are adjusted at the same height, and the trapeze is in balance.
5. Only one person at a time may use the trapeze.
6. Avoid hanging up-side-down.

WARNING!

NEVER leave a child unattended. A parent should always have visibility, and be within reachable distance from the trapeze.

CONTACT

We are happy to assist you in all matters related to Lillagunga. We do our best to respond to all incoming emails within 24 hours at: info@lillagunga.com
