

WUDN is a leader in designing & distributing real wood sunglasses for the promotional products industry. We deliver reasonably priced wooden sunglasses emphasizing quality, fashion, selection and value.

- Real wood frames & temples from bamboo, zebra wood, ebony wood, rose wood, and recycled skateboards
- Impact resistant polycarbonate lenses, block 100% of UV rays and have antiglare features
- Over 400 styles available
- High-quality lenses including UV-400 protective & polarized models
- Laser engraved customization (up to 4 locations) available at 100+ units
- Custom engraved or one-color printed packaging available at 1000+ units
- Packaging & display accessories available
- FDA & CE import certificates
- One-Time Setup Fee: \$100 on G
- Laser Engraving Run Charges \$1.25 per location on C
- Production & Shipping Time: 28-35 Days

Anatomy of Real Wooden Sunglasses

Laser-engraved logo or text available on the four temple faces:

Right and left, inside and outside.

Polarized lenses filter reflected light and reduce harmful (and irritating) glare from reflective surfaces including pavement, snow, and water, making objects appear clearer—like highway lines, the lake, or a trail in the woods.

ONE - Sunglasses Made of Wood are an Ecofriendly, Sustainable Material Choice

Most plastics and acetate are made from oil. Plastic is necessary, but that doesn't mean it can't be minimized. We use real wood on the whole frame, or at least the temples of all of sunglasses. Our wood is sourced from FSC sustainable forests. Even better, take a look at a set of recycled Skatedeck sunglasses.

TWO – Wood is Strong and Masculine While Also being Warm and Elegant

Wooden Sunglasses? Of course: Not many materials can satisfy so many different types and styles at the same time. Is wood tough and masculine? Yes. Is it also warm and elegant? Absolutely. Do wood sunglasses look equally good on men and women, totally. Wood is versatile and beautiful. Wood has the capacity to take a boring pair of sunglasses and turn them into something special, something different. Wood sunglasses take you well into "Cool" without being overstated. The focus should be on you, not on the sunglasses. That's the whole point of style.

THREE – Natural Wood Tones Complement Everything

Bamboo with Black? Check. Dark Walnut with White? Check. The natural look of wood tomes and wood grain complement pretty much any style. Better than shiny or colored plastic – wood tones are neutral and tend to match your look instead of being the center of attention.

FOUR - Every style of Sunglasses You Need

Every style of sunglasses you are looking for are available in real wood. Wanderers, Aviators,

Browline, Recycled Skatedecks, Cat-Eyes, Jackie O style. Pretty much everything except those ugly shield sunglasses, we will NEVER sell those.

FIVE – Styles as Unique as the Tress They Come From

No two trees are alike. Each has its own, unique story. A story that has been engrained deep within its bark and lumber. At WUDN, it's our job to bring the story out into the world. Every one of our wooden lifestyle products are as unique as the trees they come from, making your product truly one-of-a-kind.

SIX – Real Wood Not Green Enough For You, Try Recycled Skateboard Sunglasses

Available in multiple styles and colors it doesn't get more eco-conscious than re-purposing skate-decks that have reached the end of their life, into something new and beautiful.

SEVEN – Stronger than Plastic

Durability: Without question, durability is one of the biggest selling points of all-natural wood sunglasses. WUDN sunglasses are as rough and tough from the trees they once came from. Better yet, our sunglasses are made from the finest quality of handpicked woods to ensure superior quality, strength and durability.

EIGHT -- Even the Bamboo Packaging is Eco-Friendly

That's It. All WUDN wooden sunglasses are **real-wood**, lightweight, stylish, comfortable, handcrafted with love. All have high-grade UV-400 lenses and most deliver polarized lenses. These are the Best wood sunglasses available at these price points.
