

HornBlasters 2-Gallon Air Tank

TA-206H

Thank you for your purchase! This 2-gallon air tank has two ½” ports and 4 ¼” NPT ports available for your use. This steel air tank is 100% made in the USA and is designed to last. We typically setup the tank with the following configuration:

- ½” Ports
 - Port 1: Compressor Inlet
 - Port 2: Outlet for your horn/air accessory
- ¼” Ports
 - Port 1: Safety Blowoff Valve
 - Port 2: Air Pressure Gauge
 - Port 3: Pressure Switch
 - Port 4: Drain Cock fitting (bottom of tank facing towards ground)

This air tank can be stripped and powder coated a different color if desired. Do not get any powder on the threads of the ports. The maximum operating pressure of this tank is 150 PSI. We do not recommend running any greater pressure than 150 PSI with this air tank.
