

## SAFETY DATA SHEET

### SECTION 1: IDENTIFICATION

---

- 1.1 Product Name**  
Instant Lash Lift Set Lotion
- 1.2 Recommended Use**  
Lash Lift, Lash Perm
- 1.3 Restrictions on Use**  
Brow Lift, Brow Lamination. Off label use of product is restricted.
- 1.4 Canadian Supplier**  
THE LASH SHOP
- 1.5 Emergency Information**  
N/A

### SECTION 2: HAZARD IDENTIFICATION

---

- 2.1 Classification of Substance or Mixture**  
N/A
- 2.2 GHS Label Elements**  
N/A
- 2.3 Hazards Not Otherwise Classified or Covered by GHS**  
Harmful if ingested.  
Harmful if not used as directed.

**SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS****3.1 Chemical Characterization**

Product used for lash lift/lash perm.

**3.2 Composition**

CAS#	Chemical Name	Composition	EINECS#
7732-18-5	Water	67.82%	215-185-5
68-11-1	Thioglycollic acid	9.0%	200-677-4
141-43-5	Ethanolamine	9.2%	205-483-3
501901-81-1	Cetearyl alcohol	3.0%	***
57-13-6	Urea	1.5%	200-315-5
131954-48-8	Polyquaternium-28	3.0%	284-599-6
84931-78-2	Glycerl stearate	0.8%	284-599-6
112-03-8	Steartrimonium chloride	2.0%	203-929-1
68131-39-5	C12-15 pareth-10	2.0%	***
56-81-5	Glycerin	1.0%	200-289-5
8008-31-9	Parfum	0.5%	2657
14025-15-1	Disodium edta	0.18%	237-864-5

**SECTION 4: FIRST-AID MEASURES****4.1 Description of First Aid Measures****In case of eye contact**

Immediately rinse thoroughly with plenty of lukewarm water. Consult ophthalmologist.

**If swallowed**

Do not induce vomiting. Rinse out mouth and drink 250ml 500ml of water. Consult physician.

**In case of skin contact**

If skin discomfort or irritation occurs, immediately wash off with water and soap. Remove contaminated clothing and towels. If skin discomfort and/or irritation persists, consult a physician.

## SECTION 5: FIRE-FIGHTING MEASURES

---

### 5.1 Extinguishing Media

Dry chemical, CO<sub>2</sub>, water spray (fog) or foam. Do not use water jet.

### 5.2 Special Hazards Arising from Substance

Fine dust clouds may form explosive mixture with air. Hazardous thermal decomposition products. Decomposition may include the following material : metal oxide/oxides.

### 5.3 Advice for Firefighters

Firefighter should wear appropriate protective equipment and self contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode.

Special precaution for fire fighters: promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire .No action shall be taken involving any risk or without suitable training. Move containers from fire from fire area if this can done without risk and use water spray to keep fire-exposed container cool.

### 5.4 Further Information

N/A

## SECTION 6: ACCIDENTAL RELEASE MEASURES

---

### 6.1 Personal Precautions, Protective Equipment, Emergency Procedures

No actions should be taken involving any personal risk or without suitable training. Evacuate surrounding areas .Keep unnecessary and unprotected personal form entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking, or flames in hazard area . Avoiding breathing dust. Put on appropriate personal protective equipment.

### 6.2 Environmental Precautions

Avoid dispersal of spilt material and run off and contact with soil ,waterways, drains and sewers. Inform the relevant authorities if the products has cause environmental pollution (sewers, waterways, soils or air).

**6.3 Methods and Materials for Containment and Clean Up**

Small spill: Move containers from spill area ,use spark -proof tools explosion-proof equipment. Vacuum or sweep up material and place in designated ,labelled waste container. Dispose of via a licensed waste disposal contractor.

Large spill: Move containers from spill area, Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers ,water courses, basements or confined area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.

**SECTION 7: HANDLING AND STORAGE**

---

**7.1 Precautions for Safe Handling**

Precaution for safe handling: keep container tightly closed. Avoid contacting with skin and eyes, avoid inhalation of vapour, spray and mist. Eating and drinking and smoking are prohibited in areas where this material is handled ,store and processed. Put on appropriate personal protective equipment. Never use pressure to empty, container is not a pressure vessel. Always keep in containers made from the same material as the original one. Comply the health and safety at work laws.

**7.2 Conditions for Safe Storage, including any Incompatibilities**

Condition for safe storage ,including any incompatibility. Store in accordance with local regulations. Store in segregated and approved area. Store in original container protected from direct sunlight in a day ,cool and well ventilated area away from incompatible material, food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until for using it. Container that has been opened must be carefully resealed well and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Store in the temperature between 5~35°C.

**7.3 Specified End Use(s)**

Must be used in accordance to manufacturer's instructions.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

---

### 8.1 Control Parameters

Use only with adequate ventilation. If user operation generate dust, fumes, gas, vapour, or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep gas, vapour or dust concentration below any lower explosive limit. Use explosion-proof ventilation equipment.

### 8.2 Exposure Controls

**Respiratory protection:** Use a properly fitted ,particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure level ,the hazards of the products and the safe working limits of the selected respirator.

**Eye protection:** Safety eyewear complying with an approved standard should be used when a risk assessment indicate this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible ,the following protection should be worn unless the assessment indicate a higher degree of protection: Safety glass with side-shields. If operating conditions cause high dust concentration to be produced ,use dust goggles.

**Hand protection:** Chemical resistant impervious gloves complying with an approved standard should be worn at all time when handle all chemical products if a risk assessment indicates this is necessary.

**Body protection:** Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by specialist before handling this product.

**Hygiene measure:** Wash hands, forearms and face thoroughly after handling chemical products ,before eating ,smoking and using the lavatory and at the end of the working period. Appropriate techniques should used to remove potentially contaminated clothing.

Wash contaminated clothing before reusing. Ensure that eyewash station and safety showers are close to the workstation location.

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

---

### 9.1 Information on Basic Physical and Chemical Properties

a) Appearance	White Emulsion
b) Odour	Characteristic Odour
c) Odour Threshold	
d) pH	9
e) Melting/Freezing Point	
f) Initial Boiling Point and Boiling Range	
g) Flash Point	
h) Evaporation Rate	
i) Flammability	
j) Upper/Lower Flammability or Explosive Limits	
k) Vapour Pressure	
l) Vapour Density	
m) Relative Density	
n) Water Solubility	
o) Partition Coefficient	
p) Auto-Ignition Temperature	
q) Decomposition Temperature	
r) Viscosity	
s) Explosive Properties	
t) Oxidizing Properties	

### 9.2 Other Safety Information

N/A

## SECTION 10: STABILITY AND REACTIVITY

---

### 10.1 Reactivity

N/A

### 10.2 Chemical Stability

Product is stable.

When exposed to hot temperatures, it may produce hazardous decomposition products.

### 10.3 Possibility of Hazardous Reactions

Under normal conditions of storage and usage, hazardous reaction will not occur.

### 10.4 Conditions to Avoid

N/A

### 10.5 Incompatible Materials

Keep away from oxidizing agents, strong alkalis, strong acids.

### 10.6 Hazardous Decomposition Products

N/A

**SECTION 11: TOXICOLOGICAL INFORMATION**

---

**11.1 Acute Toxicity**

Not Toxic.

**11.2 Skin Corrosion/Irritation**

Irritation may occur.

**11.3 Serious Eye Damage/Eye Irritation**

Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of eyes.

**11.4 Respiratory or Skin Sensitisation**

Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of nose, throat, lung.

**11.5 Germ Cell Mutagenicity**

Not Known.

**11.6 Carcinogenicity**

Not Known.

**11.7 Reproductive Toxicity**

Not Known.

**11.8 Specific Target Organ Toxicity – Single Exposure**

Not Known.

**11.9 Specific Target Organ Toxicity – Repeated Exposure**

Not Known.

**11.10 Aspiration Hazard**

Not Known.

**11.11 Additional Information**

N/A

## SECTION 12: ECOLOGICAL INFORMATION

---

### 12.1 Toxicity

N/A

### 12.2 Persistence and Degradability

N/A

### 12.3 Bioaccumulative Potential

N/A

### 12.4 Mobility in Soil

N/A

### 12.5 Other Adverse Effects

N/A

## SECTION 13: DISPOSAL CONSIDERATIONS

---

### 13.1 Waste Treatment Methods

**Product:** Dispose according to the applicable local legal regulations.

**Contaminated Packaging:** Dispose according to the applicable local legal regulations.

## SECTION 14: TRANSPORT INFORMATION

---

### DOT (US)

Not dangerous goods

### IMDG

Not dangerous goods

### IATA

Not dangerous goods

## **SECTION 15: REGULATORY INFORMATION**

---

The product is classified according to Health Canada guidelines.

## **SECTION 16: OTHER INFORMATION**

---

**Print Date:** January 1, 2020

**Revision Date:** N/A
