BlueMax 70w Full Spectrum Dimmable Desk Lamp

- Natural Full Spectrum Light
- Fully dimmable from 100% to 20%
- Highest CRI of 96+
- Flicker free electronic ballast
- Lifetime Warranty

Product Description

The patented BlueMax line of dimming task and light therapy lamps promotes the brighter, healthier side of light. BlueMax uses a six phosphor blend adopting the brilliant qualities of sunlight at noon while enhancing the healthy blue spectrum. BlueMax favors the scotopic qualities of light, making it even clearer than regular full spectrum light.... More >>

I have purchased a full spectrum lamp a few years back and found it to be a fantastic investment in my health. I am not going to credit it for that, but after being short sighted (myopia) and wearing glasses for 30 years, I completely ditched them. A year ago, I upgraded to Blue Max (the 42W version). A week ago, it stopped working. I called the company and got superior customer service (two year warranty on the lamp, one year on the bulb). They correctly identified the problem as being the ballast and shipped it immediately at no charge. Buy this lamp or buy another, but invest in your eyes and get full spectrum lighting. Especially good advice if you experience winter blues. It will make you feel better.

Rating: 5 / 5

I didn't expect this desk lamp to be as large and heavy as it turned out to be. It is VERY heavy and has a fairly large "footprint" considering what it is... a desk lamp.

The quality of the lamp itself is excellent. The light is bright and very welcoming. The dimming function doesn't have the range one might expect from a dimmer switch, however.

Rating: 4 / 5

Well Built but large. Flexible neck works well and no stability problems. The natural light greatly reduces eye strain when working on the computer.

Rating: 5 / 5
