

Position the bag to your satisfaction and wrap the appropriate Frame Mounting Loop around the desired frame location. Then thread the Frame Mounting Loop into the remaining hole in that corner of the bag and loop it over the plastic Loop Adjuster located in the bag's interior in the corner you are attaching.

Squeeze the Loop Adjuster and snug the Adjusting Loop tightly to the motorcycle frame tube.

Repeat this process on the remaining attachment points.

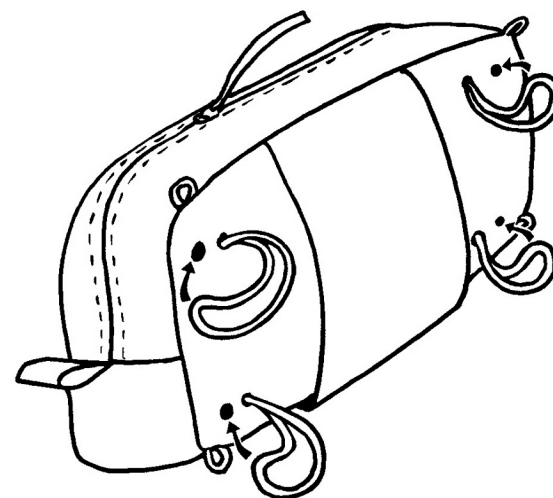

This is a small pouch and is absolutely not intended to carry any objects weighing more than about a pound. The important thing here is to simply **USE YOUR HEAD** and not overload it inappropriately.

To clean this bag, wash it in warm soapy water and hang up to dry.

#2258 Multi-Use FHB Bag

Frame Mount Instructions

Rear View of Multi-Use FHB Bag

- **Made in USA**
- **Unconditional Chase Harper Lifetime Warranty**
- **Water-Resistant DuPont™ Cordura construction**

The Chase Harper Multi-Use FHB Bag is unique in that it has the ability to mount on the "Birdcage Maserati" style frame tubes of certain high end sport motorcycles. Installation of this bag will vary from model to model and of course, common sense rules apply.

Note the above illustration; besides the very small corner loops used to mount this bag on top of certain Chase Harper tank bags, it shows the four larger corner mounting loops on the back of the bag. Depending on the mounting application, either three or four of these straps should be attached to the frame of the motorcycle. It is highly recommended that you use the four mounts, but in the event of a three mount setup, the top two mounts should always be attached.

Further instructions are on the other side of this sheet.
