

Chase Harper USA Buddy Tow (Part No. 9100)

When you need the buddy tow, its priceless! This is the only tow strap made expressly for motorcycles and ATV's. Tucked away in its carrying case attached to your handlebar or crossbar, the Buddy Tow is always ready when you need it! (Military Spec. nylon webbing. 1785 lb. test)

Mounting and Use Instructions:

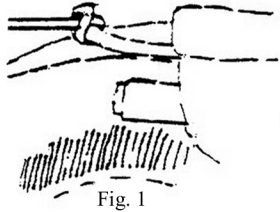

Fig. 1

Fig. 2

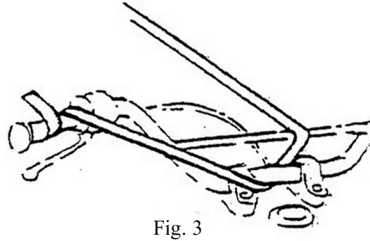

Fig. 3

1. Attach the end with the loop to the rearmost frame member of the tow bike (see Fig. 1 and Fig.2)
Caution: Always be sure tow strap is free and clear of rear wheel suspension and all moving parts!
Avoid contact with hot exhaust pipes and mufflers.

2. Route tow straps around hand grip one time only. End should be wrapped directly under your left thumb and forefinger. Never tie off or otherwise secure end in any manner! In the event of any problem during towing simply let go of the end - this will disengage the two motorcycles.

3. Attach Buddy Tow Pac to your crossbar cable or carry in your packet. Attention : Be sure Buddy Tow Pac does not interfere with the operation of your motorcycle cables or suspension: Check for clearance while pumping forks up and down.

- Always follow these precautions
