HID HEADLIGHTS

Some vehicles now come with HID headlights built in. These types of headlights do not have an LED replacement equivalent. Below is a list of HID headlight bulbs that cannot be replaced with LED headlights.

LED STOCK HEADLIGHTS

Some models of vehicles come with LED stock headlights straight from the factory. Currently, we don’t have enough information from the dealers to provide replacements for these.

INSTALLATION

When installing Performance's XR5 headlights, ensure that the diodes are shining horizontally for the most effective light output. If they are shining at an angle or vertically, they will be less effective.

All headlights should be checked for adjustment. Adjust to proper setting or have it professionally adjusted to prevent blinding oncoming traffic.

NOTE: Some aftermarket headlight housings (such as Recon, Spyder) may not allow LED headlights to shine as effectively as stock housings.
