

# Custom Fit Insoles

## Meet Wiivv

Wiivv Custom Fit 3D Printed Insoles are custom orthotics, digitally mapped from a smartphone.

## Your Practice + Wiivv

### Proven relief

**Relieve foot pain**, plantar fasciitis and foot fatigue by recommending the world's first 3D printed, custom-fit insole.

**Enhance alignment** and reduce injury risks from the ground up.

**Scientifically proven** through third party studies and biomechanically enhanced based on feedback from thousands.

### A low-cost edge

**Simple measurements:** Measure clients in-office using the award-winning Wiivv app or have clients self-measure.

**No hassle offerings:** Wiivv handles fulfillment, returns and support and is completely inventory-less.

**Leading edge:** Wiivv uses the latest in computer vision and deep learning technologies to make scientifically proven, custom fit orthotics possible for the masses.

## How it works

1

### Order

Purchase Wiivv Custom Fit 3D Printed Insoles product kits at wholesale rate.

2

### Sell

Earn revenue with every sale at MSRP. We can ship directly to your customers or to your store/practice for pickup.

3

### Profit

Recommend relief to your clients with scientifically proven, affordable custom fit insoles. If your clients don't love their Wiivvs, they can return them within 30 days for their money back.

# Over 15,000 happy customers

“I have/had a painful tendinitis/tendonopathy condition and within 24 hrs of wearing Wiivvs, the pain greatly reduced in severity and duration. 5 months later the pain is almost non-existent.

**Allan Pinvindic**

“I have had plantar fasciitis for many years and these are the best insoles I've used, better than custom orthotics.

**Maureen Radkee**

“Since wearing my Wiivv insoles I've noticed an increase in my range of motion, and I can do things I haven't been able to do for a long time—and I definitely have Wiivvs to thank!

**Tommy Europe**

## Our proud partners

## Scientifically Proven

Validated & tested in a third party study performed by Fortius Sport & Health Institute.

### Reduce foot pain

Wiivvs are scientifically proven to support your arches, reducing improper loading & stress that cause foot pain, ankle pain & plantar fasciitis.

### Enhance comfort

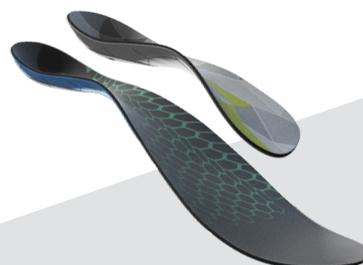

Wiivvs are rigorously tested across thousands of customers, activities and in real-world settings to provide optimum comfort for people on their feet.

### Decrease injury risks

Wiivvs are scientifically proven to reduce pronation and significantly reduce forces on the foot and ankle during active use, decreasing likelihood of injury.

### Reduce foot fatigue

Wiivvs are scientifically proven to reduce the forces acting on your foot, alleviating added stress on your muscles and ligaments, and reducing foot fatigue.
