BlockBusters

Fly a Kite

Made using Studio 180 Design's Split Rects®
and Tucker Trimmer® I Tools

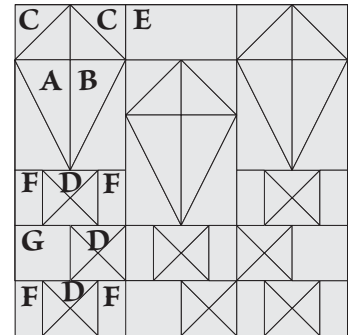

BlockBusters 2023 #78

Difficulty: ★★☆☆☆

All the instruction you need to make the units required for this block can be found in the instructions that came with your **Tucker Trimmer® I**, and **Split Rects®** tools. There are charts, step by step graphics, and directions. Use the chart to find the information you need for the finished size unit you want to make. Then work your way through the instructions.

For this block, you will make three mirror image pairs of Split Rects units in two different colors, making 3 units that slant from the lower right to upper left, Type #1, and 3 units that slant from the lower left to upper right, Type #2. Since you need to make mirror images, you will want to pay attention to the position of your strips when cutting your elongated triangles. Refer to the **Split Rects®** tool instructions to make sure you get the strips positioned right side up for Type #1 units and wrong side up for Type #2 units. Refer to the diagram to determine what color you want where before cutting your triangles. To get the mirror image pairs for the background triangles, you can fold the strips wrong side together before cutting the triangles.

You can make the half square triangles to match the colors used in the Split Rects units or use different fabric to make really colorful kites. Also, have fun with the hourglass unit colors for the tail of your kite.
