Cutting Step 2 - Cut

Step 2 - Press and Cut

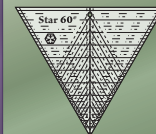

Step 4 - Press and Cut

Steps 6 & 7 - Trim, Rotate, and Trim Again

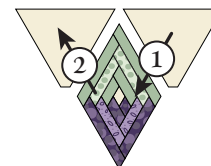

Technique Sheet for Star 60 Log Cabin Star 60 Unit Completion

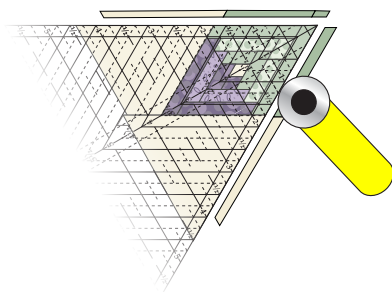

Step 9 - Cut the number of side triangles needed using the strip size listed in the chart on the technique sheet and steps 3 through 5 in the Star 60® instructions.

Step 10 - Add the side triangles to the trimmed edge. Stitch the right side triangle first, press as shown, then add the left side triangle and press as shown.

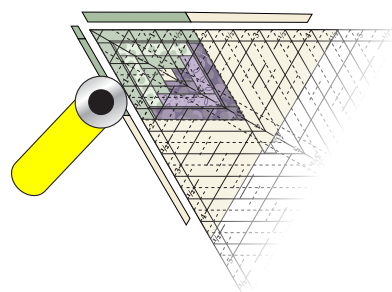

Step 11 - Trim. If your Star 60 unit is 9" or smaller, trim with the Star 60® tool following steps 11 and 12 in the Star 60® instructions. To trim a 9½" unit, use the *Flat Edge Trim Line* as the *Diamond Point Guidelines*.

Step 10 - Stitch, Press, Stitch, and Press Again

For units over 9½", position the unit as shown. Align the *Diamond Point Guideline* you used to trim the first two edges of the final round with the center diamond seams as in *Step 7 - Second Trim*. Position a long ruler next to the **Star 60®** tool. Place the ruler on the left if right handed, or the right if left handed. Remove the **Star 60®** tool and trim the edge. Rotate the unit 180° and repeat for the second edge. To trim the final edge, position the untrimmed edge on the left if right handed or on the right if left handed. Align the *Flat Edge Trim Line* with the side triangle seams. Place a ruler next to the **Star 60®** tool, remove the **Star 60®** tool and trim.
