

Gunbox SK-1 Test Fit Instructions

1. Print out this PDF 1 to 1 scale (There are 2in x 2in blocks on each page that should be measured to ensure that the size is correct)
2. Cut each of the 5 blocks horizontally on the line indicated
3. Arrange each of the 5 blocks as shown. You may want to secure with tape
4. Place your gun, with any accessories, on the paper with the stock touching the bottom edge. The gun will need to fit inside the lines without hitting any of the lines or the speaker lines
5. Make sure that your gun will be supported by the movable support. Potential locations for the support are identified on blocks 2 and 3 with a dotted line
