

THE WORLD'S FASTEST STRATEGY GAME!

Object of the Game

GET THE GOLD DIE

Setting Up

- 1 There are 15 dice. One is gold.
- 2 Separate the dice into 3 groups of 5 dice. The gold die can be in any group.

Playing

- 1 To decide which player goes first, we usually play "rock-paper-scissors," but do whatever works for you!
- 2 In one move, a player can take **1, 2, or 3** dice. However, all dice taken in one move must be from the **SAME GROUP**.
- 3 A player **CANNOT** take the gold die until the last play of the game. But, a player may take dice from the same group as the gold die throughout the game.
- 4 Once dice are picked, they are out of play and irrelevant to the remainder of the game.

Winning

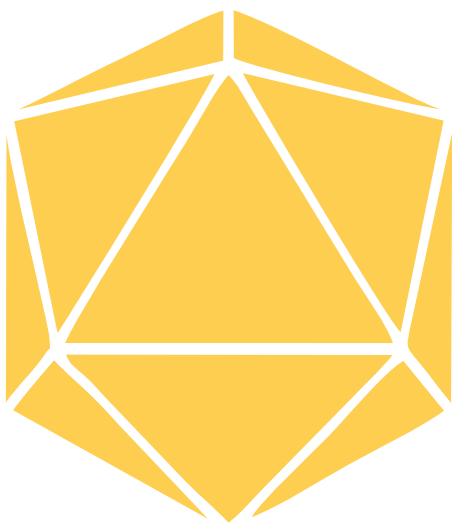

- 1 Players continue to take 1, 2, or 3 dice until one player takes the gold die!
- 2 The gold die can be taken in a group of 3 or 2, or as a single pick.
- 3 That's it!

SURPRISE!!

You can actually make anywhere between 1 to 12 groups of dice. The number of dice in each group does not matter, nor does the group the gold die is in. We just wanted to give you a guideline to get you comfortable with the game. Now that you are pros, have fun, get creative, play Ultimö!!

ENJOY!
