mbroidery-parts.com Machine Parts | Supplies | Accessories

Embroidery-parts.com stocks the largest inventory of professional embroidery products in the industry. Our coast-to-coast distribution strategy means we can usually deliver your order in three days or less.

Embroidery-parts.com is part of a larger company known as Stitch It International Inc., tracing its roots back to 1988 when its founder started an embroidery business. This business has grown over the years and now focuses on embroidery equipment sales, selling embroidery equipment nationally and shipping hundreds of machines every year to international destinations. Our combined experience of over 100 years in the embroidery business has established us as the standard in our industry.

Embroidery-parts.com and Stitch It International, Inc. is your one stop for embroidery equipment, supplies, and full service technical support and training. Contact us to day for all your embroidery needs!

IMPORTANT: All measurements in this guide are approximate.

Many of our products are made in Europe to metric specifications. When converting to English measurements, some numerical rounding may occur. In addition, manufacturers are often inexact in their processes. Your delivered goods may vary slightly in width or length from what is shown in this guide.

Gunold POLY[™] Polyester Thread

Our 100% polyester thread is manufactured in Germany and is designed specifically for high-speed, commercial embroidery and monogramming machines. It is very pliable, making it easy with which to work. Though it has a beautiful, silky sheen, it can withstand chlorine bleaching and harsh, industrial laundering. Use our polyester thread once and it will become your mainstay thread.

Gunold Poly 40 wt. (den 120/2) is available in 300 dynamic colors on 1,100 yd. Mini-King cones and 5,500 yd. Regular cones. For smaller, or more delicate designs like monograms and mini-logos, use Gunold Poly 60 wt. thread (den 70/2). Our Poly 60 wt. thread is available in 54 colors on 1,650 yd. Mini-King cones.

PolyFIRE® Fire-Retardant Thread

PolyFIRE fire-retardant thread is ideal for embroidery on firefighters' uniforms, lab coats, chef's blouses and any other textile exposed to open flame. This 100% polyester thread has a special coating which prevents the thread from easily catching fire and is tested EN ISO - Oeko-Tex Certificate

We carry 27 colors of PolyFIRE available in 40 wt. thread (den 115/2) on 1,100 yd. Mini-King cones and nine colors on 5,500 yd. Regular cones.

8650 +color no.	FILAINE 12 wt Solid Color	Regular Cone

Gunold GLITTER Thread

For sheer razzle-dazzle, you can't beat the shimmering effect of Gunold's sparkling GLITTER thread. This is a thin, flat, ribbon-like polyester film which is metalized with an aluminum, holographic layer to give it brilliant reflectiveness. GLITTER is available in gold, silver, red, blue, green and multicolor.

FLUOR™ Fluorescent Thread

Gunold FLUOR[™] will make your embroidered design "glow-in-the-dark" with an eerie green glow. Apply it to Halloween costumes, stage costuming, pillows and bedding - any place decorative items would benefit from the fun and creativity of a light sensitive design.

The duration and intensity of exposure to sunlight (or artificial light) determines the intensity of the luminous effect. The luminesence will last up to 50 washings under normal use and care.

FLUOR[™] is white in color and 100% polypropylene. It is suitable for running deisigns requiring a 40 wt. thread (den 120/2) and is available in 1,100 yd. Mini-King cones.

ORDER ITEM NO.	DESCRIPTION	SIZE
471	FLUOR 40 wt. White	Mini-King Cone

GLOWY Fluorescent Thread

Like FLUOR[™], our GLOWY fluorescent thread glows in the dark with a yellow/green color. GLOWY differs by being available in seven thread colors, which makes it useful for multicolored logos, more elaborate designs, or safety applications.

The duration and intensity of exposure to sunlight (or artificial light) determines the intensity of the luminous effect. The luminesence will last up to 50 washings under normal use and care.

GLOWY is 100% polyester thread, 40 wt. thread (den 120/2). Available in 1,100 yd. Mini-King cones.

ORDER ITEM NO.	DESCRIPTION	SIZE
472.01	GLOWY 40 wt Yellow	Mini-King Cones
472.02	GLOWY 40 wt Orange	Mini-King Cones
472.03	GLOWY 40 wt Pink	Mini-King Cones
472.04	GLOWY 40 wt Blue	Mini-King Cones
472.06	GLOWY 40 wt Purple	Mini-King Cones
472.07	GLOWY 40 wt Green	Mini-King Cones
472.08	GLOWY 40 wt White	Mini-King Cones

MONO Monofilament Thread

This is a very thin, tear resistant, monofilament, 80 wt. thread made of 100% polyester. Its unique characteristics make it perfect for unusual designs where a "clear" effect is needed. MONO has a practical side too; use it for invisible seams and when embellishing fabrics with sequins, cords or pearls.

Available in clear and smoke on 550 yd. Regular cones.

ORDER ITEM NO.	DESCRIPTION	SIZE
230	MONO Clear	Regular Cone
231	MONO Smoke	Regular Cone

Notice: The customer / manufacturer should assure himself, by preliminary testing and evaluation, that the dye fastness of the thread is suitable for his / her intended uses. Gunold USA threads are intended for use as embroidery threads only, and should not be bleached, except for polyester. They are manufactured and quality controlled to the very highest standards possible. However, since we have no control over the customer/manufacturer's washing, dry cleaning or pressing of goods onto which our thread is sewn, nor over the weather conditions to which such goods are subjected, (when used on a article or item that will remain exposed to the elements), and since the value of the thread is so disproportional to the value of the material onto which it is sewn, we are not responsible for any consequential damage that could occur to goods onto which our threads are sewn.

Encore™ Embroidery Bobbins

Gunold's signature, low-priced bobbins are especially made for our customers who want a quality bobbin at a bargain price. Each bobbin is wound with 134 yds. of continuous-filament, 100% polyester thread which is thin, but very durable.

ORDER ITEM NO.	DESCRIPTION	SIZE
896L0100-B	White "L" Bobbins	Gross (144 bobbins)
896L0300-B	Black "L" Bobbins	Gross (144 bobbins)

Gunold Magnetic Bobbins

These bobbins are pre-wound bobbins with a plastic core with a steel washer visible. Included in the box are eight **reuseable** magnetic rings (to be inserted into the bobbin case) which will attach the steel washer on the bobbin. This will enable you to have a high-yield bobbin without tension variations. Sided bobbins are wound with 124 yds. of continuous-filament, 100% High-Tenacity Polyester. Sideless bobbins are wound with 135 yds. of continuous-filament, 100% High Tenacity Polyester.

ORDER ITEM NO.	DESCRIPTION	SIZE
878L0100	White, Sided "L" Bobbins	Gross (144 bobbins)
877L0100	White Sideless "L" Bobbins	Gross (144 bobbins)

Sideless Bobbins with Core

Gunold's sideless bobbins are pre-wound with 155 yds. of 100% polyester filament thread. They have been designed to work with most brands of embroidery machines. This is our benchmark bobbin.

ORDER ITEM NO.	DESCRIPTION	SIZE
895L0100-C	White "L" Bobbins	Gross (144 bobbins)

Coats V15

The best known brand of bobbin in the industry, we stock Coats bobbins in both "L" (132 yds.) and "M" (235 yds.) styles. Both styles are pre-wound with 100% continuous filament polyester thread which is thin and very durable. They are available in white or black, and cones of white thread for bobbin winding are also available.

ORDER ITEM NO.	DESCRIPTION	SIZE
892L0100	White "L" Bobbins	Gross (144 bobbins)
892L0300	Black "L" Bobbins	Gross (144 bobbins)
892M0100	White "M" Bobbins	Gross (144 bobbins)
892M0300	Black "M" Bobbins	Gross (144 bobbins)
89100100	White Bobbin Thread	Cone (7,000 yds.)

Coats Magnetic

To complement Coats Trusew bobbins, Coats has introduced Coats Trusew Magnetic for applications requiring tension consistency and over spin prevention. Coats Trusew Magnetic combines the optimum yield and consistent tension control of Coats Trusew Magnetic with the instantaneous braking action of the magnetic core.

ORDER ITEM NO.	DESCRIPTION	SIZE
879L0100	White "L" Bobbins	Box (100 bobbins)

OLE™ Embroidery Bobbins

Our low-priced OLE bobbins are made for Gunold by a leading bobbin manufacturer. Each bobbin is wound with 132 yds. of continuous-filament, 100% polyester thread which is thin, but very durable.

ORDER ITEM NO.	DESCRIPTION	SIZE
892L0100-B	White "L" Bobbins	Gross (144 bobbins)

Fil-Tec Magna-Glide P15 Bobbins

Fil-Tec Magna-Glīde bobbins are known as the "high-yield bobbin without tension variation." Hightenacity, polyester filament thread is wound on a magnetic core to give you consistent thread delivery throughout the entire bobbin. Gunold stocks Fil-Tec Bobbins in style "L" (135 yds.) pre-wound with black or white thread or style "M" (230 yds.) pre-wound with white or black thread. Sold in boxes of 100

ORDER ITEM NO.	DESCRIPTION	SIZE

897L0300	Black "L" Bobbins	Box (100 bobbins)
897M0100	White "M" Bobbins	Box (100 bobbins)
897M0300	Black "M" Bobbins	Box (100 bobbins)

NEB Alternative Bobbins

Plastic-sided bobbins in "L" (115 yds) style. Each is prewound with high-quality, 60 wt. polyester thread. Available in white and black. Made in the USA.

ORDER ITEM NO.	DESCRIPTION	SIZE
893L1001	White "L" Bobbins	Gross (144 bobbins)
893L1005	Black "L" Bobbins	Gross (144 bobbins)

Spun[™] Bobbins 100

This is the embroidery industry's standard in bobbin thread. Spun[™] Bobbin 100 thread is 100% spun polyester which is very strong and offers excellent tension control. Available in "L" (114 yds.) and "M" (207 yds.). We also offer it in 11,000 yd. cones in both white and black thread.

ORDER ITEM NO.	DESCRIPTION	SIZE
881L0100	White "L" Bobbins	Gross (144 bobbins)
881L0300	Black "L" Bobbins	Gross (144 bobbins)
881M0100	White "M" Bobbins	Gross (144 bobbins)
88000100	White Bobbin Thread	Cone (11,000 yds.)
88000300	Black Bobbin Thread	Cone (11,000 yds.)

Bobby Cot[™]

If your embroidery calls for a 100% cotton bobbin thread, Bobby Cot is the choice of pros. Bobby Cot[™] is intended for delicate script, "dainty" embroidery and for use on fabrics and garments which will be dyed. It offers good tensile strength and is recommended when loose tension is required. We offer Bobby Cot[™] in "L" (92 yds.) and "M" (140 yds.) pre-wound bobbins with sides.

ORDER ITEM NO.	DESCRIPTION	SIZE
871L0100	White "L" Bobbins	Gross (144 bobbins)
871L0300	Black "L" Bobbins	Gross (144 bobbins)
871M0100	White "M" Bobbins	Gross (144 bobbins)

Bobby Syn[™] 120

Though this spun polyester thread is thinner than Spun™ Bobbin 100, it is just as strong. We stock it in white, 11,000 yd. cones only.

ORDER ITEM NO.	DESCRIPTION	SIZE
88500100	White Bobbin Thread	Cone (11,000 yds.)

Gunold USA proudly offers a full line of backings for every embroidery need. All of our backings are available as standard rolls or die-cuts, in a variety of sizes. If you need backing in a custom size, let us know. We'll be happy to provide a quote for custom cut rolls and die-cuts to meet your specifications.

Whether it's cap backing, black backing, custom sizing, packaging, perforating, slitting or rerolls - Gunold has you covered!

BACKING

Allstitch™

A 100% polyester, cut-away backing made in the USA. It has a grid core to give it strength and a soft non-woven fabric surface to help reduce skin irritation. It is thicker and stronger than other backings making one piece suitable for designs with high stitch counts on unstable fabrics.

ORDER ITEM NO.	DESCRIPTION	SIZE

Water Soluble Materials

SOLVY® is a Gunold trademarked product. This consistent, water-soluble quality film is used for detalled embroidery on high-pile fabrics like terry cloth bathrobes, towels and knitwear. Solvy is also popular as a dissolvable, water-soluble backing.

Gunold SOLVY® - The Original!

A 20mil, water-soluble plastic film used especially for embroidering on knitwear, terrycloth or any high-plie fabric. SOLVY® is used on top of the fabric which allows much more detail to be seen on any intricate design by preventing the stitches from getting lost in the nap. A light misting of water dissolves SOLVY®.

ORDER ITEM NO.	DESCRIPTION	SIZE*
400	Clear Roll	110 yds. x 40"w
400.1	Clear Roll	110 yds. x 10"w
400.31	Clear Roll	110 yds. x 13"w
400.29	Clear Roll	110 yds. x 4" w

400.4	Clear Die Cuts	7" x 7" (500 pieces)
400.6	Clear Die Cuts	5" x 5" (500 pieces)

^{*}More sizes are available on our webiste: www.gunold.com

► HELPFUL INFORMATION ABOUT GUNOLD SOLVY®

SOLVY® is an amazing, water soluble plastic film. It is used to prevent the stitches from getting lost in the nap of knitwear garments. It also prevents the loops from jumping up on terrycloth during the embroidery process. SOLVY® allows much more detail to be seen on any intricate design. It is not to be used on velvet, corduroy or silk.

Using SOLVY® is easy. Just follow these steps:

- a. Place SOLVY® on top of fabric or hoop it in with the fabric,
- b. After the embroidery process is complete, tear-away the larger areas of SOLVY® inside and outside of the design.
- c. Dissolve SOLVY® on very small areas by lightly misting with water. The residue will disappear and be removed from the fabric at first washing. (Note that embroidery should not be left damp or wet longer than a few minutes.)
- d. On larger areas, mist lightly to dissolve SOLVY®. After a few seconds the dissolved SOLVY® residue may be removed with a damp sponge or cloth.

NOTE: SOLVY® should be kept in a closed plastic bag.

Perforated SOLVY®

This is a roll of 20mil, Gunold SOLVY® which has been perforated for convenient and economical use.

ORDER ITEM NO.	DESCRIPTION	SIZE*

Super SOLVY™

This has the same characteristics as SOLVY®, but is twice as thick (40mil).

ORDER ITEM NO.	DESCRIPTION	SIZE
405/220	Clear Roll	220 yds. x 40"w
405/110.1	Clear Roll	110 yds. x 10"w

Ultra SOLVY™

Our 80mil SOLVY is extremely stable and has a non-embossed texture. As a bonus, it sticks to fabrics when moistened. It is four times as firm, thick, heavy, and strong as our original SOLVY. It is often used to support freestanding embroidery designs.

ORDER ITEM NO.	DESCRIPTION	SIZE
405/80	Clear Roll	110 yds. x 40"w
405/80.1	Clear Roll	110 yds. x 10"w
40425	Clear Roll	16 yds. x 20"w

Fabri-SOLVY[™]

Fabri-SOLVY™ is a 1.25 oz., opaque, fabric-like, water soluble stabilizer which has a soft, silky feel. It behaves like fabric during embroidery, allowing ease of stitching and is easily removed like a water soluble stabilizer. It can be used as a topper or backing. Fabri-SOLVY™ rinses away cleanly, leaving your design soft and comfortable against the skin. Perfect for those with sensitive skin and babies.

ORDER ITEM NO.	DESCRIPTION	SIZE
401/60	White Roll	131 yds. x 60"w
401.1	White Roll	131 yds. x 30"w
401.7	White Roll	131 yds. x 17.5"w
401.9	White Roll	131 yds. x 11.5"w
401.2	White Die Cuts	8" x 8" (500 pieces)
401.8	White Die Cuts	8" x 8" (100 pieces)

Cover the Back™

This is a polyester, circular knit mesh with a polyamide adhesive coating. Its main use is to cover the back of your embroidery design preventing snags and protecting sensitive skin.

ORDER ITEM NO.	DESCRIPTION	SIZE
200-60-200	White Roll	200 yds. x 60"w
200-30-25	White Roll	25 yds. x 30"w
200-20-25	White Roll	25 yds. x 20"w
200-20-25-B	Black Roll	25 yds. x 20"w

HELPFUL INFORMATION ABOUT COVER THE BACK™

Cover the Back™ prevents a coarse embroidery design from touching sensetive skin. Great for baby apparel, polo shirts, lingerie, sports apparel, or any embroidery that may be irritating to the skin

For best results, cut Cover the Back™ one half inch larger than your design. Place coarse fusible side down, over the back of the design. Using a heat press at 250°-270° degrees with pressure set at 3-4 bars, press for 10 to 14 seconds. A household iron may be used, using the highest heat setting the garment will allow. Keep Cover the Back™ in sealed bag or container.

Heat Away™ (Thermogaze™)

Similar to SOLVY® except it is used on fabrics that cannot get wet like corduroy or velvet. It is placed on top of the fabric which allows significantly more detail to be seen when intricate designs are sewn. It is removed with an iron or heat press. Heat Away™ is also used to create free-standing embroideries and can be used as a backing.

ORDER ITEM NO.	DESCRIPTION	SIZE
480.1	Single Roll	110 yds. x 10"w
480	Single Roll	110 yds. x 30"w

№ HELPFUL INFORMATION ABOUT HEAT AWAY™

Heat Away™ is a special heat-sensitive, woven cotton fabric often referred to as "burn-away" or "aetz-cloth." It is used in the following situations:

- a. On top of fabrics that cannot get wet, like corduroy or velvet, to keep stitches from sinking in and getting lost.
- b. To create "free-standing" embroidery. Just hoop Heat Away™ and embroider directly onto it. After removing the Heat Away™, only the embroidered pattern remains.

After the embroidery process is complete, adjust your flat-iron or your thermo-press to the temperature for lining (248°F - 356°F). Press the garment for 15 seconds. During this process, the Heat Away™ disintegrates. The remaining fibers, in the embroidered pattern, must be brushed out. A soft-bristle brush works best.

Heat Away™ must be protected against moisture, heat and sun. It should be stored in a closed plastic bag. Embroidered patterns from which Heat Away is not removed immediately should also be stored in a closed plastic bag. Heat Away does not become useless if stored incorrectly, but it will be more difficult to remove.

18

THERMOfilm™

This is a heat-sensitive film which can be completly removed after embroidering. It is an alternative to using regular backing when you do not want residue on the fabric.

ORDER ITEM NO.	DESCRIPTION	SIZE
406/030	Clear Roll	330 yds. x 39.5"w
406/030/55	Clear Roll	55 yds. x 39.5"w

HELPFUL INFORMATION ABOUT THERMOfilm™

Beautiful embroideries without stabilizing? That's impossible - THERMOfilm, however, is a stabilizer that disappears after embroidering. Embellishments on lady's outerwear, children's wear and fine baby wear should have an extremely smooth finish. And if both sides of finished patterns are visible, stabilizer residues should not be seen. THERMOfilm is a heat-removeable film that can easily be torn away after embroidery. Small residues can completely be removed with an iron. You'll have flawless embroideries that look great on both sides. Ideal for smooth fabrics!

IMPORTANT! Keep THERMOfilm in a dry place and away from direct sunlight.

Thermofix

Greatly speeds up appliqué work and patches - cut it out, iron it on the finished appliqué or patch, then permanently affix it to your desired position with a heat press. Also great for fusing edges and seaming.

ORDER ITEM NO.	DESCRIPTION	SIZE
42225	Clear Roll	27 yds. x 15.7"w
413	Silicone Paper Roll	55 yds. x 15.4"w

HELPFUL INFORMATION ABOUT Thermofix™

Cut it out. Iron it on. That's all there is to it. Using Thermofix, it is quick and easy to affix embroidery designs onto jackets, shirts and fabrics. Your design will adhere permanently—even after frequent washings! Thermofix is just like a nonwoven that consists of adhesive fibers. It is ironed onto the finished embroidery design after the embroidery process. Then the emblem is placed onto the desired spot of your fabric and has to be permanently fixed either with a household iron or a heat press. But there is even more to Thermofix than making fast and easy appliqués: It is the perfect solution for very small and tricky areas where fixation by machine is simply impossible. Also great for fusing edges and for seaming!

IMPORTANT: Thermofix must be used in combination with silicone paper.

Thermoseal™

Waterproof your embroidery! Use Thermoseal to seal the back of your embroidery and moisture will not penetrate the fabric through the tiny needle punctures.

ORDER ITEM NO.	DESCRIPTION	SIZE
416	Single Roll	11 yds. x 20"w
41610	Single Roll	11 yds. x 10"w
41604	Single Roll	11 yds. x 4"w

The Helpful Information about Thermoseal™

Think of all the products you can now embroider - rain gear, outdoor jackets - all kinds of functional clothing can be embellished and the wearer will stay dry. Use it on work clothes for construction, first responders, and the military. Even outdoor gear like duffle bags, backpacks, tents, and sports equipment bags can be embroidered with names and logos, and the contents will remain high and dry. Entirely new market segments are now open as wide as your imagination will take them.

IMPORTANT: All garments/products should be heat tested prior to applying this material.

Gudy Stick

A double-sided adhesive film bonds to your fabric without the need for heat-setting. Just peel, sitck to your appliqué, place on your fabric, and satin stitch around the edges to finish it off. Simplifies and speeds up the apppliqué process.

ORDER ITEM NO.	DESCRIPTION	SIZE
652120/122	White Roll	27 yds. x 48"w
652120-40	White Roll	27 yds. x 16"w
652120-30	White Roll	27 yds. x 12"w
652120-20	White Roll	27 yds. x 8"w
652120-10	White Roll	27 yds. x 4"w

HELPFUL INFORMATION ABOUT Gudy Stick

Appliqué work is child's play when using Gudy Stick: this special film, adhesive on both sides, allows positioning of appliqué to base fabric without ironing. It lets you produce neat embroideries without farying edges, simply by coating your fabric with Gudy Stick before cutting out or lasering. Just stick on the appliqué, satin-stitch around it, and it's ready - it saves time and prevents rejects. Gudy Stick is excellent value for money!

SPECIALTY BACKINGS

Heat N' Seal (BSN™)

Heat N' Seal is a sealing film which permanently heat seals patches and emblems onto all commonly used fabrics. It is a polyamid hot-melt adhesive, supplied as a film on silicone release paper. Order Type H for use with a household iron. Type J(I) is to be used with a fusing press.

ORDER ITEM NO.	DESCRIPTION	SIZE
410.1	Type H* Roll	110 yds. x 10.5"w
410	Type H* Roll	110 yds. x 21"w
410.2	Type H* Roll	22 yds. x 21"w
415.1	Type J(I)** Roll	110 yds. x 10.5"w
415	Type J(I)** Roll	110 yds. x 21"w
415.2	Type J(I)** Roll	22 yds. x 21"w

HELPFUL INFORMATION ABOUT HEAT N' SEAL

- *TYPE H: This type has been designed for use with a household iron. It will withstand dry cleaning and a warm water wash cycle (up to 100°F) after it has been allowed to dry for 48 hours.
- **TYPE J(I): This type has been designed to be applied with a fusing press. It will withstand dry cleaning and boiling water after it has dried for 48 hours.
- **STEP 1:** Tack Heat N' Seal to the back of the embroidery. It is important that neither the temperature nor the pressure be too high in this first step.
- a. TYPE H: Put the iron setting on wool or about 275°F. Keep the iron moving for 10-15 seconds. If using fusing press with Type H you only need 4-6 seconds at three pounds per square inch (psi).
- **b. TYPE J(I):** Set the fusing press to 320°F at 3-4psi for 4-5 seconds.

You are now ready to trim the embroidery and remove the silicone paper.

STEP 2: Fuse embroidery to the garment.

- a. TYPE H: When possible, the heat of the iron should come through the garment during Step 2. This means that the embroidery should be face down with the garment over it when the heat of the iron is being applied. This will draw the adhesive from the embroidery to the garment. The temperature setting for the iron should be on high or linen during this application. We suggest you press vigorously for 20-30 seconds.
- b. TYPE J(I): The fusing press temperature needs to be set higher; about 330°F. The pressure should be set between 5-20 psi for about 10-15 seconds.

Please allow Heat N' Seal to dry at least 48 hours for the most effective use. All of the above are averages to serve as guidelines. Adjustments may need to be made to reflect thickness and heat flow through the fabrics used. Thicker fabrics require higher pressure. Time and pressures can be varied. Higher temperatures allow shorter fusing time.

Organ Needles - Round Shank

These needles are highly-polished, surgical steel in ballpoint and sharp styles. All Organ needles have extra large eyes for easier threading and larger shafts for decreased deflection. Ballpoint needles are available in six polular sizes and sharp needles are available in three sizes

ORDER ITEM NO.	DESCRIPTION	SIZE

Titanium-Nitrite Needles

If you're looking for a tough, long-lasting needle, this is it. These needles are treated with titanium nitrite and are three times stronger than ordinary needles. Testing has shown these needles have five times the reduced attrition at the tip. Fewer needle breaks means less down time and increased efficiency.

Adhesive Spray

KK100™ is the original spray adhesive made specifically for the embroidery industry. It is a non-toxic, temporary spray adhesive and is great for holding die-cuts in place for appliqué or to prevent shifting between backings and fabrics. It can be used to hold Puffy Foam™ in place while embroidering. KK100™ is absorbed into the fibers of the fabric within 24-36 hours.

ORDER ITEM NO.	DESCRIPTION
490	KK100 in 18 oz Spray Can
-	KK100 in Case of 12, 18oz Cans
495	KK100 Economy in 18 oz Spray Can
-	KK100 in Case of 12, 18oz Cans

HELPFUL INFORMATION ABOUT KK100™

KK100 is a non-toxic, temporary, adhesive spray. It fully absorbs within 24-36 hours. It has many uses, including the following:

- a. Used on stretch knits to significantly reduce the fabric movement of sweaters and knit shirts while embroidering. Just spray the backing with KK100™ and hoop together with the fabric.
- b. Can be used to hold Puffy Foam™ in place while embroidering.
- c. All KK products can also be used with appliqué. Just spray the die cut and place (even reposition if necessary) onto the fabric for embroidery.
- d. Used on slippery material to help eliminate puckering. Spray the backing and hoop together with fabric.
- e. Holds unfinished garments in place. Spray fabric and stick to hooped backing. Especially great for pockets and patches.
- f. Good for screen printers also; provides a tacky surface without stains and leaves no residue.
- g. KK100™ eliminates hoop marks. Try it on collars and cuffs. Spray fabric and stick to hooped backing.

Durkee Hooping Pro - Full Station

Introducing the revolution in hooping stations from Durkee. The Full Station version of the Hooping Pro can be used with almost any size or style hoop - tubular, magnetic, wooden - with no additional attachments required. It's ready to go, right out of the box. A convenient adjustment feature keeps hooping at a comfortable angle and the unique articulating, laser, cross-hair lamp makes pinpoint accuracy possible. Made in the USA of industrial quality materials including infinitely adjustable brass stops and a nearly indestructible steel frame.

What's in the box?

- Three (3) embroidery placement templates The Embroiderer's Helper for sizes Small - Extra Large
 - The Embroiderer's Big Helper for sizes XL, XXL, and XXXL
 - The 'Lil Helper for embroidery placement above shirt pockets
- PAL2 Perfect Alignment Laser Crosshair Lamp includes table mount and laser light holder which can be mounted directly to either leg of the Full Station.
- Eight (8) brass bumper stops
- Two (2) Backing/Stabilizer Holders
- Two (2) Freedom Ring Mounts

Durkee Hooping Pro - Full Station

ORDER ITEM NO.	DESCRIPTION
HOOPINGPRO1	Durkee Hooping Pro-Full Station

Durkee Hooping Pro - Project Station

The Hooping Pro Project Station version is designed to make consistent placement of your designs possible on smaller, narrower projects like shirt sleeves, pant legs, onesies, backs of caps, tote bags - anything that doesn't fit on the Full Station version.

Includes: Two (2) stabilizer legs, Eight (8) brass bumper stops, Two (2) Backing/ Stabilizer Holders, and Two (2) Freedom Ring Mounts.

Project Station Boards

Attaching these Station Boards to your Project Station will add to its versatility. Each Station Board is sold individually and is designed to economically address specific hooping needs. Each one slides onto your Project Station in less than five seconds. Each Station Board includes Board Two (2) additional stabilizer legs to mount to your Hooping Pro - Project Station to provide additional stability. Each board also includes Two (2) spring -loaded centering pins for locating the center of your design on the board.

Infant Station Board (shown on Project Station) Sized for infant wear from New Born to 5T.

Junior Station Board (shown on Project Station) Perfect for children's sized clothing like polo shirts, t-shirts, Station, but shorter. Great jackets and uniforms.

Plus Station Board (shown on Project Station) Same width as the Full

for adult left and right chest embroidery up to XXL shirts with an 18cm hoop.

Project Station Board - Junior
Project Station Board - Plus

HOOPING PRO

Durkee Embroidery Hoops

Never overpay for hoops again! Durkee Embroidery, Inc. is renowned for their unbreakable, tubular embroidery hoops. The plastic component of the round hoops is guaranteed for a lifetime against manufacturer's defects. We will exchange the plastic component at no cost provided the breakage is not due to abuse or using the parts in a manner not consistent with commercial embroidery practices. We also offer a total satisfaction guarantee. We will refund or exchange any product within 30 days of purchase for any reason.

You're going to love these hoops:

Constructed from high impact plastics: The high impact plastics make the Durkee Hoops virtually indestructible and reduces vibration through the hoop.

Brass inserts for all screws: Molded brass inserts will reduce the chance for screws to loosen by providing greater holding power.

Light texture on hooping surface area: Texturing the hoop's surface provides better holding of garments during embroidery for better registration.

Double height: The additional height of the hoop also helps in holding thicker, hard-to-hold garments.

Thumbscrew is larger and longer than our competitors: The larger size of the thumbscrew provides more torque, so it is easy to adjust and opens wide for thick garments.

Wide space for thumbscrew adjusting: The extra space for reaching the thumb screw also aids in adjusting the ring.

IMPORTANT: BEFORE YOU ORDER YOUR PACKAGE

To order, determine the manufacturer and model of your machine. Then, determine the overall hoop width needed to match your machine. Overall width means the total distance from the end of one bracket to the other bracket. You'll need this info to place your order.

Size	Common Uses	Actual Actual Inside Dimension
9 cm, round	cuffs, collars, pockets, hat sides	8.1 cm diameter (3 3/16")
12 cm, round	hat backs, hat sides, smaller left chest	11.2 cm diameter (4 3/8")
15 cm, round	most polular left chest size	14.2 diameter (5 5/8")
18 cm, round	larger left chest, small jacket backs	17.1 cm diameter (6 3/4")
15cm x 15cm, square	tote bags, back packs, small jacket backs	15.5 cm (6")
24cm x 24cm, square	children's clothing, ideal for larger square designs which round hoops can't accommodate	23.2 cm x 23.2 cm (9.25" x 9.25")
30cm x 15cm, rectangle	may be used 30cm wide and 15cm deep or 15cm wide and 30cm deep, ideal for long narrow designs on bags, sleeves, pantlegs or shirt yokes	30cm x 15cm (11 7/8" x 6")
335mm x 329mm, rectangle	jacket backs, accommodates large designs, adult full fronts, widest double- height hoop on the market for popular 360 and 380 needle spacing.	29.5mm x 29.5mm (11 5/8" x 11 5/8")
410mm x 300mm, rectangle	accommodates very large designs, double-height, ideal for the largest designs on jacket backs, blankets, flags, etc.	29.5mm x 40mm (11 5/8" x 16")

Durkee Embroidery Hoop Packages

Nothing is better than Durkee Embroidery Hoops - unless, of course, you could buy these fantastic hoops in a cost-saving package!

We offer three packages to save you money. Whether you opt for the Standard, Advanced or Deluxe package, you can count on never overpaying for hoops again.

Hoop packages are available for all commercial hoops shown on pages 35-42 except Bably Lock and Brother PR 600. However, when you order three or more Baby Lock or Brother PR 600 hoops, we offer a 10% discount on your order!

Durkee Hoop Packages

DESCRIPTION	
Standard Package - includes 1 of each hoop	
Standard Package - includes 2 of each hoop	
Advanced Package - includes 1 of each hoop	
Advanced Package - includes 2 of each hoop	
Deluxe Package - includes 1 of each hoop	

Deluxe Package includes 2 of each hoop

Standard Package Includes Round & Square Hoops 09cm Round (3.5") 12cm Round (4.5") 15cm Round (5.5") 18cm Round (6.5") 335mm x 329mm Square (11.5" x 11.5") Hoops are Shipped with Brackets Attached

Advanced Package

Includes Square & Rectangular Hoops 12.5cm x 24cm Rectangular (5" x 9") 15cm x 15cm Square (6" x 6") 24cm x 24cm Sauare (9" x 9") 335mm x 329mm Square (11.5" x 11.5") 30cm x 15cm Bi-Directional (12" x 6" or 6" x 12") Hoops are Shipped with Brackets Attached

44

Deluxe Package

Includes Square & Rectangular Hoops

12.5cm x 24cm Rectangular (5" x 9")

15cm x 15cm Square (6" x 6")

24cm x 24cm Sauare (9" x 9")

335mm x 329mm Square (11.5" x 11.5")

30cm x 10cm Bi-Directional (12" x 4" or 4" x 12")

30cm x 15cm Bi-Directional (12" x6" or 6" 12")

300mm x 410mm (12" x 16") OR 410mm x 300mm (16" x 12")

Hoops are Shipped with Brackets Attached

IMPORTANT: BEFORE YOU ORDER YOUR PACKAGE

To order, determine the manufacturer and model of your machine. Then, determine the overall hoop width needed to match your machine. Overall width means the total distance from the end of one bracket to the other bracket. You'll need this info to place your order.

Durkee Freedom Ring™

The original Freedom Ring™ is available in a 15cm round and 12cm round- the most popular left and right chest embroidery hoop size. We also offer it in a 4x4in sewing field hoop for Brother and Babylock 6 and 10 needle machines. More sizes and shapes are being developed, so be sure to visit the Gunold website for updates.

Freedom Rings can be ordered with any complete hoop assembly. You can also purchase them as an outer ring (only) to use as a replacement ring for Allied, Durkee, Happy, Melco, SWF, and Taiima hoops.

Durkee Cap Frames

Embelish caps with logos and designs up to 5" wide and 4.5" tall with this all metal frame from Durkee Hoops. It attaches to multi-needle machines just like a normal hoop. Allows for embroidery on the back of the hat as well. Alignment guides aid in achieving consistent results.

STITCH SAVER™ (STEP™)

A textured, 100% polyester fabric which looks like it has been embroidered.

Stitch Saver™ is used as a background material for patches and emblems, saving time and money. Available as a master roll or on a per-yard basis (in select colors). Call your sales rep for volume pricing.

CANVAY[™]

Small lettering and intricate details are more distinct on the plain weave of Canvay. Contrary to Twilly, you can print onto Canvay because it consists of 100% polyester. Laser cut appliques guarantee absolutely neat embroidery edges and save the time of manual cutting. Another great advantage is that letters and monograms turn out needle-sharp. An impressive quality for extremely comfortable processing.

ORDER ITEM NO.	DESCRIPTION	SIZE
42261002	White	1 yd. x 30"w
42261005	Black	1 yd. x 30"w

For this special felt, barbed needles are used to mechanically tangle fibers into a premium felt fabric. Felty is ideal for embroidery projects since it is non-elastic, soft and has a smooth surface - there is nothing to deflect the embroidery needle. High quality appliqués, emblems and patches.

FABRICS

Puffy Foam™

This popular material adds dimension to your embroidery. Puffy Foam™ is made of ethylene vinyl acetate. It is water resistant, non-toxic and can be machine washed and dry-cleaned. Please note that this product is flammable. Puffy Foam™ comes in thicknesses of 2mm, 3mm, 4mm and 6mm. Colors vary per sheet size. Use Gunold's KK100™ to help hold Puffy Foam in place. See our website for information. IMPORTANT: Embroidery designs must be digitized for using Puffy Foam.

PUFFY FOAM

Alba-5 Lubricant

This amazing can of lubricant delivers one drop of oil each time you depress the button. A precision metering system prevents drips and runs, putting 100% clear lubricating oil exactly where you want it. No waste and no stains.

Lily White Embroidery Machine Oil

This is a crystal clear, nondetergent mineral oil ideal for all embroidery machines. The high purity and clear color make it perfect for use when the lubricant may come in contact with fabrics. Available in a 4 oz. Zoom Spout and 32 oz. refill.

FABRIC SEAL SOLON ANTI-DESHLACHLOV Anti-DESHLAC

Fabric Seal

This fine-mist fabric sealer will prevent unraveling, thread slippage and seam failure by sealing the edges and securing thread ends. It won't stain and it eliminates over-edge stitching.

PSR II Powdered Dry Cleaning Fluid

Removing grease, oil stains, rings and circles is as easy as spray-it-on, let-it-dry, brush-it-off. This product is low odor, non-toxic, and contains no clorinated solvents (no Prop 65 warnings!). It drys quickly and leaves no "rings", so it's safe to use on silk, satin, cotton, wool, taffeta, acetates and more. Complies with California VOC standards.

ORDER ITEM NO.	DESCRIPTION	SIZE
499-1605	Alba-5 Lubricant	6.84 oz. Can
499-3014	Lilly White Embroidery Machine Oil	4.0 oz. Bottle with Zoom Spout

MISCELLANEOUS

GUNOLD'O MicroFonts:

GUNOLD°

PUEFYFonts Letters

MasterFonts

Instantly increase your shop's productivity and profits with 150+ of the most popular, fully-digitized keyboard lettering fonts. Also includes several monograms. MasterFonts was created by a professional digitizor who had a vision to make it easy for nondigitizers to navigate and embroider like a professional. Many of these fonts are not included in your embroidery digitizing software or with the software that came with your machine.

MicroFonts

The first ever, fully-digitized, commercial, micro-lettering system. Easily create clean, crisp embroidery lettering as small as 3mm! Your creativity will never again be limited by the size of your lettering.

Get ten popular fonts already digitized and ready to go with this software package.

PuffvFonts

Now anyone can stitch Puffy Foam lettering.

This unique software includes 13 popular font styles specifically digitized for embroidery using Puffy Foam® and 40 wt. thread. It's versatile and easy to use.
