

NEW!

TUFF TANK JACKET

The **NEW! TUFF TANK JACKET** provides rugged, yet flexible and lightweight protection for the contents contained within the RTT Portable DEF tanks against extreme temperature changes and UV exposure.

FEATURES:

Thermal Retention

- Keeps tank contents protected from harmful UV rays
- Outer Shell marine grade Sunbrella fabric – oil and stain resistant
- Insulation (Thinsulate) liner provides thermal protection in both hot and cold seasons
- Integrated lid cover for full enclosure
- Lightweight, flexible and compact

Easy to Install

- See-through site gauge for fluid level visibility
- 4-way securing mechanisms: Snap, Strap, Bolt, Hook & Loop

Internal Heating Elements

- Dual affixed heating elements with direct-tank contact
- Multi-point sensors to ensure reliability of fluid temperature
- Built in fixed controller to regulate heating elements

HEATING ELEMENT SPECS:

- 120 VAC
- 500 Watts
- 4.6 Amp
