Available in 53 and 114 gallons, the BlueTruckMaster suits a variety of applications including agricultural, construction, forestry, transport and logistics. Built from high-quality polyethylene, all tanks are resistant to structural damage, changing weather conditions and UV radiation. The BlueTruckMaster offers a quality, cost saving and compliant solution.

BlueTruckMaster®

Quality Design and Reliability

The BlueTruckMaster is built from high quality polyethylene providing resistance to structural damage, changing weather conditions and UV radiation.

Excellent Return on Investment

Lightweight, portable storage solution offering a faster and safer delivery of DEF to any point of use.

Portability & Design Features

The BlueTruckMaster has been designed to go anywhere and to withstand the toughest of site conditions. Additionally, the unique internal baffle wall helps to minimize spillage when in transit - protecting DEF and the environment.

Standard Equipment

- Semi-transparent PE tank with internal partition
- Locked lid
- Gas cylinders to facilitate the opening of the lid
- Suction tube equipped with a filter to ensure the cleanliness of the liquid
- Self-priming pump 12V DC
- Dispensing hose with automatic nozzle
- Automatic pressure relief valve
- Threaded inlet connection

Key features:

- Specialized tank design enables installation on a vehicle using transporting straps
- Integrated bulkhead to reduce movement of transported liquid
- Closable cover to protect tank equipment and armature against unauthorized access
- Integrated pump to allow instant filling
- Automatic filling nozzle to protect against spills during refueling
- 5-year tank warranty and 2 years on equipment
- The highest quality components designed for long-term DEF storage
